The Nicholls & Clarke Group is a business dedicated to the manufacture and supply of the finest building materials. Founded in 1875 in London, we have grown from servicing the capitals' building trades to becoming the largest privately owned national manufacturer and distributor of fine quality building products.

Quality manufacturing is at the core of our business and comes as standard. We own state of the art manufacturing facilities based across the UK and Central Europe. This gives us the broadest manufacturing capability available, allowing us to offer an extensive portfolio of product, more specialised than that of any of our competitors.

Our distribution network is supported with our private fleet of over 110 commercial vehicles. This gives us full logistical control from the point of manufacture through to delivery to site. We offer a nationwide delivery service, be that to site, home or commercial address. The vast majority of our deliveries are made on a next day basis.

Founded in 1875 as manufacturers and suppliers of building products, N&C Phlexicare has a longstanding pedigree with over 45 years of experience as the major inventor and innovator in the healthcare industry. We are proud to introduce the latest edition of the Phlexicare catalogue.

Inclusive design sits at the very core of our company philosophy. We believe that our products offer the end user and specifier unrivalled choice and a practical, attractive solution that is inclusive in every sense. Our British and European factories design and manufacture to the highest of standards using only the finest materials.

Recycled materials are used in much of our manufacturing which is combined with the latest energy efficient manufacturing processes. We are constantly engaged in research and development and continue to liaise with disability organisations to ensure that the products and systems in this catalogue deliver an attractive, barrier free, accessible environment for use by us all.

Nicholls & Clarke

— Est 1875 —

Establecida en 1875 como fabricante y proveedora de productos para la construcción, con más de cuarenta años de experiencia como la más importante inventora e innovadora del sector de la asistencia médica, N&C Phlexicare se siente orgullosa de presentar la más reciente edición del catálogo Phlexicare.

El diseño inclusivo es una parte esencial de la filosofía de nuestra empresa. Creemos que nuestros productos ofrecen al usuario final y a quien haya solicitado su fabricación un número de opciones incomparable y una solución práctica y atractiva que es inclusiva en todos los sentidos.

Nuestras fábricas británicas diseñan y fabrican conforme a las más altas normas y utilizan sólo los mejores materiales. En gran parte de nuestra fabricación se utilizan materias recicladas y ello se combina con los más recientes procesos de fabricación, de alto ahorro de energía.

Llevamos a cabo continuas actividades de investigación y desarrollo y nos mantenemos en contacto con entidades dedicadas a asuntos de minusvalía, a fin de asegurarnos de que los productos y sistemas de este catálogo creen un entorno que sea atractivo, exento de obstáculos y accesible para todo el mundo.

تأسست عام 1875 كشركة مصنعة وموردة لمنتجات البناء، وتتمتع بخبرة 40 عام كشركة مخترعة ومبتكرة في عالم الرعاية الصحية. " أن انا سي فلنكسكير " (N&C Phlexicare) تتفخر بتقديم أحدث نسخة من كاتالوج الماكسكير .

يقع التصميم الشامل في صميم جوهر فلسفة شركتنا. نحن نؤمن أن منتجاتنا تقدم للمستخدم الفعلي ومن يطلبها بالتحديد خياراً لا يضاهي وحلاً عملياً جذاباً وشاملاً من جميع النواحي.

مصانعنا البريطانية تصمم و تصنع وفقاً لأعلى المستويات مستخدمة أفضل المواد. تستعمل مكونات يعاد استعمالها في الكثير من منتجاتنا وتضم في تصنيعها أحدث عمليات التصنيع من ناحية توفير الطاقة.

إننا نشارك بصقة مستمرة في الأبحاث والتطوير ونستمر في التواصل مع هيئات الإعاقة للتأكد من أن المنتجات والأنظمة المبتكرة في هذا الكاتالوج تقدم بيئة جذابة خالية من العوائق ومتوفرة لكي نستعملها كلها.

N&C Phlexicare 成立於 1875 年，我們一直專注於建築產品的生產和銷售，從事過醫療保健業的研發及革新 40 多年，現隆重推出最新一期的產品目錄。

「和合設計」(inclusive design) 一直是我們公司的核心理念。我們相信，我們的產品能夠為最終使用者和建築規範專家提供既實用、美觀，又能適合各種應用的解決方案。

我們的產品品質卓越，所選用的均是最優質的原材料，而且都是在英國設計及生產。我們的生產過程大量採用再生物料，生產流程也採用了最新的節能技術及設備。

我們一直專注於產品的研發，並一直與殘疾人士組織緊密合作，確保新的產品及系統能夠為所有使用者營造一個美觀、無障礙、方便的居住環境。

Pro-door

Selector Guide

Build your bathroom adaptation shower pack using our easy step by step Pro-door selector guide. Match the door style code highlighted in blue with the appropriate floor former or shower tray. Then, turn to the Pro-door section of the catalogue to find the relevant door size.

1. Open the fold out that can also be found within the rear cover.
2. Select the floor former or shower tray that you require.
3. Turn to the relevant catalogue page that details the Pro-door size options available in that door style.

Each set of Pro-doors is supplied with a pair of appropriate compensators, curtain and track.

Independent living, **inclusive** design

N&C Phlexicare are pioneering, British manufacturers and distributors of showering, daily living, access, wall & floor and kitchen solutions within the healthcare construction market. We design, manufacture and distribute a full range of inclusive solutions with users, carers and installers in mind.

Our products are inspirational by design, functional by nature and produced using high quality materials. Our passion is to enable freedom and independence for users with different levels of abilities, within commercial or domestic environments.

N&C Phlexicare invented many of the products taken for granted today, such as the raised height W.C pan, low entry shower tray and half height shower doors. Our commitment to research and development has led to the creation of many unique products which are specified and used throughout the U.K and exported worldwide.

One of Phlexicare's key core values is 'attractive, inclusive design' claimed by many but achieved by few. To that end, we work very closely with charities and organisations such as 'Disability Rights U.K', 'The Centre for the Accessible Environment', Occupational Therapists and disabled users to ensure that our products achieve solutions for all, users and the people that care for them.

Experience

Established in 1875, Nicholls & Clarke has pedigree that has been developed over many years. Through great heritage, we have gained a depth of knowledge and invaluable experience in the manufacturing and supplying of Phlexicare products to the construction market. We have experience across many industries with a huge portfolio of products suited to all project environments.

Total Solution Providers

Part of the Nicholls & Clarke Group, we have the ability to offer the complete adaptation solution using a comprehensive range of quality products, so that you can benefit from dealing with one source, making it easier to co-ordinate project supplies. From kitchens, bathrooms, to access and wall & floor solutions, we work with you to provide the complete solution for your project.

Inventors & Innovators

N&C Phlexicare invented the raised height W.C. pan to assist with the transfer from wheelchair to toilet. We also invented half height shower doors for carers where users may require assistance. The N&C Phlexicare RADAR Key Scheme Lock is another innovation that has transformed the everyday lives and independence of millions within the UK. N&C Phlexicare continue to innovate within the industry, embracing new technology and better defining our portfolio with attractive products that perform, but where quality and functionality are crucial at its peak.

International

N&C Phlexicare products are used in over 70 countries throughout the world in some of the most demanding commercial situations. This worldwide experience has furthered the development of some of the latest technologies we now use in the U.K.

Training

We offer practical training courses at our 120,000 square foot head office facility. Our team of experts will demonstrate and give clients and customers the opportunity to get hands on with our range of products. For further information please contact your local depot or head office on 020 8586 4600 or email us at info@nichollsandclarke.com

Technical Service

Our team of Phlexicare specialists are able to offer a full technical specification service and are available to attend any site address throughout the U.K. A technical written specification is available on request. We offer CAD drawings for easier

Research & Development

Our product development team are highly equipped and constantly engaged in research and development. Investment in the latest testing facilities allow us to push forward with the development of the next new technology or raw material, that will further enhance product performance. Prior to going to market, we carry out rigorous testing to ensure that our products' performance is to a consistently high standard. Our products undergo thorough testing to meet the relevant standards and regulations. We also test our competitors products to ensure our products remain best in class.

Nationwide Delivery

N&C Phlexicare offer a market leading delivery service. We operate a fleet of 100 commercial vehicles and offer a next day shower pack delivery service. We manufacture bespoke Pro-door shower screens to order, delivering them to any address within 48 hours. Our local distribution centres offer an express trade collect service for all the everyday products that you need to complete a project.

Trade Associations & Technical Committees

N&C Phlexicare has been heavily involved in the creation of British & European Standards for decades. We have chaired the TTA Wetroom Technical Committee. We continue to push for stringent policing of the industry which would stop manufacturers falsely claiming specific European standards on packaging. Our philosophy has always been to drive up quality and standards whilst remaining highly competitive.

Environment

As an ISO14001 company, sustainability is a core part of our company agenda. As well as various carbon offsetting programmes in place, we invest a great deal in manufacturing and developing solutions dedicated to reducing our carbon footprint, and in turn increasing our customers' green credentials.

Customer Care

We aim to provide you with an outstanding level of customer service that will help to further enhance the service you offer to your clients. We monitor our performance levels and strive to achieve 100% client satisfaction. We believe that open channels of communication with our customers, coupled with their feedback are a sure way of further improving our customers buying experience.

British Manufacture

Our three state of the art U.K manufacturing facilities comply with ISO 9001 and ISO 14001, utilise the latest manufacturing technologies and apply stringent quality control checks during every part of the manufacturing process. Only the highest quality raw materials and packaging are used, ensuring the finished product meets our exacting standards, far exceeding those of the latest European standards.

Warranties

N&C Phlexicare products are manufactured to such high and exacting standards enabling us to offer a fantastic warranty on all our products.

Product Quality

All our products are tried and tested prior to being introduced into the marketplace. All N&C Phlexicare products exceed the requirements or the relevant BS/EN Standards, offering specification clients and contracting customers the confidence in our product quality.

Anti-Microbial Protection

All of our shower trays are impregnated using the Wells Silver Ion System. This is a non organic system, which will not lose its effectiveness over time, as opposed to some other systems. The Wells Silver Ion System has proven effective against a large range of Gram Positive Bacteria such as Staphylococcus Aureus, MRSA, Listeria and Gram Negative Bacteria such as Escherichia Coli, Pseudomonas Aeruginosa and Salmonella. The additive is also effective against moulds and fungi such as Aspergillus Niger and penicillium Chrysogenum.

Our history & heritage

leading the way ahead...

Nicholls & Clarke were established in 1875 as glass, lead and oil merchants in Shoreditch, London. We have grown from strength to strength into national manufacturers, distributors and retailers of building materials. It was in the early 1970s when the sanitaryware department began offering products designed for the elderly and disabled as well as producing its own specialist equipment under the N&C Phlexicare brand name. The underlying policy was to design products which, while perfectly acceptable for anyone to use, would be of particular benefit to individuals with different levels of abilities.

Inventors and Innovators

The high level of engagement has led to various inventions and innovations over time that have naturally developed through knowledge and experience. N&C Phlexicare was the first company to introduce rise and fall units for kitchens and bathrooms, enabling users with different levels of abilities to lead a more comfortable life.

Introducing the raised height pan

The first raised height toilet within the industry was another superb invention. Until this point a wheelchair user had to lift themselves up, often purely with the strength in their arms or with the help of a carer, to transfer from a toilet pan back to a wheelchair. The development of a toilet pan the same height as a standard wheel chair made this transfer far easier and in many cases allows the user to retain dignity as they no longer require assistance.

Paving the way in the industry

Founded in 1958 by Les Mason and Ken Forbes, N&C Phlexicare was formed as an arm of the Nicholls and Clarke Group, rapidly being recognised as leaders within the healthcare construction market. As major inventors and innovators in the healthcare industry, the company were unique in their positioning through conducting continuous research and product development, allowing them to gain invaluable insight into the diverse needs of people with different levels of physical abilities.

Over the years, N&C Phlexicare were rapidly being recognised as highly reputable manufacturers and distributors in the healthcare construction market, catering to both the commercial and domestic markets. The success of the company meant credibility was on a continuous rise. Today, the company sit on various BSI Committees and are very much involved in the creation of new BS/EN Standards.

rise and fall units and healthcare kitchens

These introductions that we take for granted have become even more important over the decades with increasingly stringent regulations and standards to ensure equality within public buildings, an area where N&C continues to be a major supplier.

'With R&D at the heart of the company, N&C Phlexicare invented a series of products taken for granted today such as the raised height pan, half height shower doors and low entry shower trays.'

In the early days, understanding the difficulties carers faced when showering users without getting wet led to the introduction of half height shower doors, a revolutionary idea that allowed carers to assist a disabled person using a shower seat without repeatedly soaking the carer. Les Mason, who had been the driving force behind Phlexicare's development, was awarded the MBE in 1989 for services to buildings for the disabled.

N&C Phlexicare was growing strongly, becoming a leader in the provision of a wide range of products, including the RADAR (Royal Association for Disability and Rehabilitation) lock. Invented in collaboration with RADAR, this innovative door locking system with a universal key is used throughout the UK to keep public

toilet facilities secure and available exclusively for use by those with a disability. This important product continues to flourish today as the 'National Key Scheme'. The N&C RADAR lock can be found in thousands of public spaces where toilets are available.

N&C Phlexicare offers clients an end to end solution, where most competitors at the time solely supplied bathroom and kitchen solutions. We have worked closely with industry leading charities, C.A.E (Centre of Accessible Environments), as well as DRUK (Disability Rights UK) as manufacturers of the National R.A.D.A.R. (Royal Association for Disability and Rehabilitation) locks.

From day one, personal interaction, providing full support and building partnerships with clients has been a core part of N&C's philosophy. To aid this, the very first traveller E. J. Brett was introduced back in 1875. Today, N&C continue to invest heavily in their UK wide, external technical sales team, employing on average 50 fully trained representatives that are well equipped with a wealth of technical advice and experience.

The way ahead

Research and development continue to be vital in product design and manufacture. N&C Phlexicare has developed into a market leader in a rapidly developing sector as the population gets older and the demand for attractive, innovative solutions increases. Innovation has

always been part of the N&C philosophy, from creating the world's first raised height pan to developing half height carer shower screens. Phlexicare continues to work with organisations such as Disability Rights UK in further developing the RADAR lock and key scheme. In 2015 N&C launched the fifth generation of this unique product, which has improved the lives of millions of disabled people for the past 40 years. Today, the N&C Phlexicare range offers more than 6,000 products, including bathroom, kitchen and access solutions, and more recently, a greatly enhanced portfolio of wet room options.

With the many extrinsic influencing factors such as an ageing population and new government initiatives, N&C Phlexicare are constantly developing, innovating and changing with the needs of the market to stay ahead. With strong roots, an impressive heritage and a wealth of knowledge and experience gained over the years, the company will continue to make an impact in many years to come.

Launch of the Phlexicare showroom, Shoreditch

A business dedicated to a sustainable future

The environment matters. N&C Phlexicare are committed to a continuous programme of improvement in this important area of business. We have an environmental committee which meets regularly to assess our performance and levels of progress. We train all our people to be environmentally aware in the workplace as we can all make a difference on a daily basis.

Together, we will promote the best use of environmental practice, and more particularly N&C Phlexicare will:-

- Continuously improve environmental performance
- Reduce consumption of resources
- Measure and take action to reduce the carbon footprint of business activities
- Ensure environmental criteria are taken into account in the procurement of goods and services
- Encourage staff involvement in environmental issues
- Expect similar environmental standards from all business partners
- Meet or exceed all environmental legislation that relates to the business

To meet these commitments N&C Phlexicare will:

- Set and monitor strategic objectives and targets for managing environmental performance
- Communicate internally and externally this commitment and environmental performance
- Work together with staff and business partners to promote improved environmental performance
- Review the environmental policy regularly

As manufacturers and distributors, N&C Phlexicare has made a corporate commitment to improving its environmental performance through an Environmental Policy. This will provide the framework for all our work, whether it is in relation to energy efficiency, sustainable waste management or sustainable transport. A committee (Environmental Committee) will implement this policy by developing programmes of work that constitute an Environmental Management System.

The Environmental Committee will monitor the effectiveness of its policies and actions.

International Standards – Achieving ISO14001

With the growing demand for products to be sourced from more eco-friendly production, a high volume of carbon dioxide emissions have been considerably reduced, as a result of the new procedures in place to effectively tackle climate change and the negative effects on the environment, continually advocating the prudent use of natural resources. These processes have led to the accreditation of ISO 14001, the international standard for environmental management systems (EMS). This achievement ensures that our customers are benefiting by proving the products are sourced from an ISO 14001 company.

“Through controlling our CO2 emissions, our customers benefit by sourcing their products from a responsible manufacturer. We have recognised the importance of the environment on future generations and proactively work towards reducing the environmental impact within our manufacturing processes.

Stephen Forbes, Deputy Chairman, Nicholls & Clarke.

Carbon Footprint

Our manufacturing processes, buildings, delivery and travel policies are monitored continuously which has already reduced our carbon emissions.

Product Development

Our Chemists consider the impact a new product will have on the environment. We work hard to develop low impact formulations that still give the specifier, professional tiling or screeding contractor the performance and handling characteristics they require.

Logistics

We own and operate a private fleet of low carbon commercial vehicles. Our transport managers hold a 'Certificate of Professional Competence' and ensure that we use our fleet efficiently using efficient routing and maximising vehicle capacity.

Social Responsibility

We believe that a sustainable and responsible business will ultimately become a more successful one. We respect the local communities we operate in and work closely with them ensuring we minimise our impact on them. We support a national charity that works closely with communities and families, providing disadvantaged children with much needed, vital equipment.

Raw Materials

We are continually reviewing our raw material suppliers to ensure that we select partners with responsible credentials.

Low Carbon Manufacturing

We continue to invest in the latest low carbon manufacturing equipment. We make use of grey water technology, solar panels & low energy lighting systems. .

Energy Saving

Our aim is to keep our energy consumption to a minimum and to use the greenest sources wherever possible.

Packaging

Wherever possible we make use of packaging with a recycled content. Certain products like 'Ecoflex' use unbleached naturally coloured packaging.

Recycling

Pallets are repaired and reused internally to reduce our consumption of wood. Pallets beyond repair are sent to be recycled rather than being land filled. We also recycle plastic, paper and cardboard.

Waste Reduction

The latest manufacturing techniques and the use of grey water technologies have reduced the amount of waste our manufacturing facilities create.

Carbon Offsetting

N&C Phlexicare supports a carbon offsetting program designed to benefit the environment through delivering reliable emission reductions.

We also have electric car charging stations at some of our branches to promote the use of electric cars.

The Perfect Partnership Across Industries

Domestic

Manoeuvring in the home, whether a care home or family home can be taken for granted, where everyday tasks are perhaps not as easy as it once was. N&C Phlexicare are specialists in providing inclusive, accessible solutions that overcome obstacles found in everyday living, from accessible ramps, bathrooms to rise and fall kitchen units.

Hospitality

Accessibility, reliability, durability, comfort and maintenance are important factors to consider in the design and build of hotels, restaurants and bars etc. The design of the building affects the overall experience and perception of the establishment. We offer a wide range of products from Document M 'MPacks', raised height toilets facilities to RADAR locks and keys. As manufacturers of the RADAR lock and key, public disabled facilities can now be kept clean, and vandal free. We manufacturer and supply the products required for creating accessible ensembles and wet rooms nationwide.

Leisure

As a society, we are driven more and more to engage in physical activities on a regular basis. It is important for the leisure industry to provide access solutions for all. Whether enjoying a swim at the local pool or trip to the local park, our past times should ensure a barrier free experience. N&C Phlexicare have partnered with a number of organisations, such as the National Trust, to provide accessible solutions.

Retail

According to the Equality Act 2010, it is a requirement for public places such as our high street shops and shopping centres to provide inclusive facilities and information for all. Visitors must be able to access, manoeuvre and use facilities available to them. At N&C Phlexicare, we have worked with many high profile retailers and shopping centres on access solutions, bathroom solutions and changing places to ensure compliance in these areas.

Commercial

Since the implementation of disability discrimination legislation, a company can face prosecution if their premises are inaccessible to people with disabilities.

Improvements are not restricted to building access, but also include the introduction of additional features such as grab rails, touch legible signage, induction loops and visual and audio alarm systems. N&C Phlexicare have assisted in supplying solutions to help companies to implement the necessary changes.

Education

Every student deserves to have the same educational experiences as their peers. It is against the law for a school or other education provider to treat disabled students unfavourably. An education provider has a duty to make 'reasonable adjustments' to make sure disabled students are not discriminated against. These include changes to physical features such as ensuring all students can easily access the classroom and having the ability to use toileting facilities independently.

Our Commercial Partners

Our Commercial Partners

We have worked in partnership with an extensive list of customers throughout the UK and worldwide on some of the most demanding projects imaginable. Our products continue to perform today and will continue to do so for the life of the building or project.

This pedigree has created ultimate confidence in the marketplace for N&C Phlexicare products. Today we have N&C Phlexicare products specified by many recognised UK and international brands and are also working with many of the UK's premier contractors, who in turn work in partnership with these brands.

Premier

Shower Deck

Our Premier Shower Deck is a robust, self supporting solution for achieving a total level access wet floor showering area with confidence. Tried and tested, the Premier Shower Deck is manufactured to high quality performance and endurance.

Premier Shower Deck is ideal for creating a level access shower area with ease. As the strongest available floor former in the UK market, accepting up to 470kg, the robust structure is manufactured using high precision moulds for strength and durability. With a self supporting structure, Premier Shower Deck can be placed directly onto underfloor joists without the need for additional support.

Premier Shower Deck is the perfect solution for use in wet rooms. With built in falls, the gradients in the deck encourage the swift removal of waste water.

Designed with easy installation in mind, Premier Shower Decks can be installed into existing concrete or timber floors. Offset waste outlets have been designed to avoid joists (in most circumstances) for easier access to the pipework. The pre-cut outlet is suitable for use with gravity waste or pumped waste systems (see page 89,95, 101).

Pre-cut linear drainage options are also available.

Our Premier Shower Decks are easy to install and can be tiled directly onto, or covered in vinyl. Although several sizes and formats are available, it can also be trimmed by up to 60mm on each edge for onsite flexibility making installation easier.

Features and benefits:

- Strong and durable base made from 50% recycled material
- 22mm profile
- Can be tiled directly on to or covered in vinyl
- Built in gradients for water removal to the waste, minimum 2%
- Ideal for total level access
- Waste offset to avoid joists in most circumstances
- Pre-cut waste outlet suitable for gravity waste or Phlexiflow and Hydro-Flow pumped waste systems
- Self supporting, no requirement for additional support underneath
- Can be trimmed by up to 60mm on each edge
- Accepts over 470kg loading
- Manufactured using high strength precision metal moulds

The Premier Shower Deck's 22mm profile allows easy installation into either timber or concrete shower areas.

Lifetime Warranty

Installation

Timber

The Premier Shower Deck can be installed into an existing timber floor by removing the floorboards and fixing the former directly onto the joists. If the deck protrudes more than 100mm over a joist, support noggins should be installed. The floor should be brought level with the former to make the room level and ready for a suitable floor covering.

Concrete

The Premier Shower Deck can be installed into an existing concrete floor by removing the screed and setting the floor former in a position to leave it level with the remainder of the shower room floor. When all pipework is complete the whole shower room floor, including the new shower area can be covered with suitable vinyl flooring or tiled.

Pro-door System

To select your style from the full range of Pro-doors, please open the front and back page fold outs sections.

To choose from the full range of Pro-door sizes turn to pages 56 - 77

The majority of Pro-door sets are supplied with the option of wall compensators for a shower tray (straight) or wet room installation (curved).

Select either the tray or wet room code.

NOW also available to order in Silver

Pro-door features and benefits

- 1) Aluminium box construction
- 2) P.E.T.G superior frosted strengthened panels
- 3) Clean white finish
- 4) 3 point white seal
- 5) Concealed neodymium magnets
- 6) Unique bi-fold door locking system for added safety and strength
- 7) Stylish round design
- 8) Simple single screw locking system for door and compensator
- 9) Wall compensators allow for 30mm of adjustment / extended compensator available
- 10) Improved rapid rise and fall hinge system with extended foot for extra stability
- 11) Unique rounded labyrinth joint system

Aqua-floor

Shower Deck

Aqua-floor is our new, innovative shower deck with a unique cellular structure that makes it the most robust and strongest shower deck for vinyl installations.

The NEW 'Aqua-Floor' shower deck is a high strength wet room shower deck that has been compression moulded using a high glass content SMC formulation.

Computer Aided Modelling was used to create this unique, ribbed design to the underside of the Aqua-floor. Independent tests prove Aqua-floor's structural cellular design enables us to achieve the highest levels of durability and strength of SMC floor formers on the market, with minimal deflection. At 350kg point loading, Aqua-floor offers complete confidence in its rigidity and strength.

Features and Benefits:

- Market leading strength and rigidity
- Accepts 55 Stone / 350kg of loading
- Unique high grade SMC formulation
- Computer aided cellular structure design
- Suitable for timber / joist installation
- Beds well into concrete / screed substrates
- Unique cross linked rib design for optimum strength
- No under boarding required
- 22mm level access base
- Pre formed fixing holes
- Drill guideline - if additional fixing points are required
- Precision engineered gradients / slopes
- Pre-cut waste outlet suitable for gravity waste or Phlexiflow and Hydro-Flow pumped waste systems
- Waste offset to avoid joists
- Can be trimmed on site
- Uk manufactured

The Aqua-floor Shower Deck's 22mm profile allows easy installation into either timber or concrete.

The Aqua-floor Shower Deck can be installed into an existing timber floor by removing the floorboards and fixing the former directly onto the joists. Fix noggins to support the perimeter on the former. The floor should be brought level with the former to make the room level and ready for a suitable floor covering.

The Aqua-floor Shower Deck can be installed into an existing concrete floor by removing the screed and setting the floor former in a position to leave it level with the remainder of the shower room floor. When all pipework is complete the whole shower room floor, including the new shower area can be covered with suitable vinyl flooring.

Universal Shower Tray

The Universal Shower Tray is an ideal solution if you are looking to achieve versatility with installation configurations. With a profile of 35mm, the tray can be recessed for level access or surface mounted.

The Universal Shower Tray is a durable, slip resistant shower tray manufactured with a smooth, gel coating for the creation of a hard wearing surface. The fully encapsulated structure encompasses metal strengthening bars for rigidity. Our Universal Shower Trays can be fitted directly onto an existing floor to create a 35mm low level access. Alternatively, the tray can be bedded into the floor to provide level access. Both options of installation can be achieved on a concrete screed or timber

boarded floor area. It is suitable for use with our Pro-door showering options and many of our other shower screens and enclosures.

Our Universal Shower Tray is suitable for use with both traditional gravity waste systems or pumped waste systems such as our Phlexiflow and Hydro-Flow Pumps for the removal of water. Maximum flexibility can be achieved within the design as the tray can be reversed and placed in the most appropriate position to suit the existing waste outlet on site. The unique drainage channels help direct the waste water towards the outlet.

The Universal Shower Tray has an easy to clean, brilliant white, hygienic and slip resistant surface. It is available in a wide range of sizes to suit all bathrooms.

Features and Benefits:

- Durable, brilliant white, slip resistant base
- Unique drainage channels
- Metal strengthening bars for rigidity
- Gel coated for a hard wearing surface & ease of cleaning
- Fully encapsulated board structure for increased stability and comfortable handling
- Suitable for low level or level access, installed in or on the floor
- Waste outlet suitable for gravity and Phlexiflow top or bottom exit pumped waste systems
- Non handed tray as the waste is positioned centrally
- Fully reversible to help gain the most appropriate waste location
- Wells silver ion content to stop bacteria growth
- Where it is not possible to sink the tray into an existing concrete or timber floor a loose ramp is available which can be cut and attached to the tray on site.

The Universal shower tray's 35mm profile allows easy installation into or on top of wood or concrete shower areas.

The Universal 1800mm tray can be cut down to a minimum of 1500mm as there are metal strengthening bars that cross the tray at 100mm intervals and comes complete with end panel section.

This allows greater flexibility for onsite conditions and allows one tray to be provided for many different scenarios.
e.g a 1560mm alcove can be catered for by cutting an 1800mm tray to the exact size required and then fixing the finished end panel section.

Quick Fit

Shower Tray

Our Quick Fit Shower Tray is a high quality, fully encapsulated product that incorporates an innovative, unique drainage system. The sensor operation, with built-in suction pump and specially designed drainage channels, assist in the effective disposal of water. The Quick Fit Shower Tray is the ideal solution where the floor cannot be breached, or where it is difficult to fit a standard waste system into the floor. The low level shower tray makes it the perfect solution for users requiring accessibility.

A fast, easy to install solution incorporating an attractive, high quality and fully functional design for easy access showering. The low level profile and brilliant white finish allows for an inclusive, sophisticated looking product in the bathroom, moving away from a clinical aesthetic.

Through quality manufacturing, Quick Fit is a robust, highly durable solution with a slip resistant surface and an anti-microbial finish for greater user confidence and hygiene.

Quick Fit is designed to be easily connected to any waste pump system, including Phlexiflow and Hydro-Flow, using 15m or 22m pipework. This enables speedy installation of a low level shower tray to an unbreachable floor.

Features and Benefits:

- Unique drainage channels for effective water disposal
- Designed for unbreachable floor installation
- Durable brilliant white slip resistant base
- Unique drainage channels
- Metal strengthening bars for rigidity
- Gel coated for a hard wearing surface and easy cleaning
- Fully encapsulated board structure for increased stability and comfortable handling
- Suitable for low level access
- Silver ion anti-microbial treated to stop bacteria growth
- Fully reversible to help gain the most appropriate waste location
- Designed for easy and speedy connection to a pumped waste system

Easy Fit

Shower Tray

Our Easy Fit Shower Tray has been designed for installation onto unbreachable floors, where a gravity waste is required instead of a pump. The Easy Fit Shower Tray incorporates high quality construction and rigidity through its fully encapsulated structure that conceals pipework.

The Easy Fit Shower Tray has a unique gravity waste design which means the pipe work can be hidden beneath the 90mm high tray, speeding up the installation process and eliminating the need for pipe work to be bedded into the floor or wall.

The Easy Fit Shower Tray has been designed to be attractive and effective so that water runs away quickly and the unique waste eliminates the risk of users damaging their feet.

The tray is suitable for use with the full range of our Pro-door shower door options. The flexibility of the design includes a central waste which can be reversed and used left or right handed; this means the installer can place the tray in the most appropriate position to suit the waste on site.

The design benefits from metal strengthening bars to create a rigid tray which is completely encapsulated with gel coating to provide a smooth, hardwearing finish. The tray has an easy clean, brilliant white hygienic slip resistant surface. It is available in a wide range of sizes to suit all bathrooms and has a cut down option.

Features and Benefits:

- Durable brilliant white slip resistant base
- Unique drainage channels
- Metal strengthening bars for rigidity
- Gel coated for hard wearing and ease of cleaning
- Fully encapsulated board structure for increased stability and comfortable handling
- Suitable for low level access
- Wells silver ion content to stop bacteria growth
- Suitable for gravity waste with unbreachable floor
- Non handed tray as the waste is positioned centrally
- Fully reversible to help gain the most appropriate waste location

- Most direct outlet preferred route.
- Second option add one 90° elbow under tray

Steel support struts for extra strength.

Easy Fit 90mm profile allows easy installation onto timber or concrete shower areas.

Trimline

Shower Tray

Our ultra modern 26mm slim profile shower tray with an attractive brilliant white finish and ant-microbial coating for hygiene and extra confidence. Perfect for creating an attractive, accessible showering area for wheelchair users or those requiring help assistance.

A stunning minimalistic look that is both practical and stylish. Sited into the floor and then tiling up to the edge, the future of wet room showering is created by a seamless transition from floor to shower tray.

Suitable for both our Pro-doors, and glass screens.

26mm in height and available in four sizes, dedicated centre waste outlet with a minimum flow rate of 24 litres per minute.

- 900 x 900mm
- 1200 x 900mm
- 1200 x 1200mm
- 1500 x 800mm

Features and Benefits:

- Durable brilliant white shower tray
- Suitable for low level installation on or into the floor
- Can be used on timber or concrete/ screeded floors.
- Waste position is centred
- Made from stone resin and recycled plastic
- Anti-microbial coating

Trimline's 26mm profile allows easy installation in or onto shower area, wood or concrete.

Phlexi-Mat

Shower Mat

With its slip resistant surface, our resilient Phlexi-Mat solution helps cushion falls, helping to reduce serious injuries. The Phlexi-Mat is made from strong, flexible PVC sections with channelled underbars for increased drainage of large amounts of water. With its embossed, slip resistant surface and sanitized anti-bacterial and anti-fungal additives, Phlexi-Mat is ideal for showering areas in commercial and domestic environments.

Phlexi-Mat is perfect for use both internally and externally for barefoot traffic. The matting is hygienic, warm and comfortable to stand on, and easy to clean and maintain. It is easily cut to shape and can be installed in minutes without the use of fixing tools.

The four way drainage system assists speedy clearance of waste water.

Phlexi-Mat contains anti-microbial protection* which will protect against bacterial and fungal attack or rotting. It also hinders the growth of algae and helps prevent microbially caused discolouration.

The mat is coloured throughout and can be cut to size to suit all of the Phlexicare shower trays**. Alternatively, it can be ordered in rolls of 10m.

*Anti bacteria-sanitized additive:

Test SN195 920-Determination of the anti bacterial effect against Staphylococcus aureus ATCC 6538. Result- Nil growth

**The Flush Fit trays come complete with a Phlexi-Mat

Flush Fit

Shower Tray

The Flush Fit Shower Tray is a unique, alternative option of achieving level access showering and offering the highest degree of slip resistance. The integrated slip resistant mat allows speedy clearance of waste water.

This exclusive system comes complete with a flush fitting tray and integrated slip resistant mat in red, white or blue, raising the user clear of surface water. The mat is comfortable, lightweight, flexible, easy to keep clean and ideal for the partially sighted as colour contrast can be achieved.

A 4-way drainage system assists speedy clearance of waste water. Both the mat and tray contain anti-microbial protection which will protect against bacterial and fungal attack or rotting, hinder the growth of algae and help prevent microbially caused discolouration. It is available in a wide range of sizes to suit all bathrooms and is ideal for use with our Pro Doors.

With a slimline shower tray base, Flush Fit provides an ideal option when it comes to functional level access showering. Combined with our many Pro-door options, the two products complement each other to provide a clean stylish finish to the showering area.

Features and Benefits:

- Durable brilliant white slip resistant base
- 50mm tiling upstand
- Gel coated for hard wearing and ease of cleaning
- Fully encapsulated board structure for increased stability and comfortable handling
- Suitable for level access or low level access
- Waste outlet suitable for gravity, Phlexiflow and Hydro-Flow pumped waste systems
- Waste is uncut
- Waste position right/left or rear corner
- Comfortable, warm slip resistant mat, keeps the user out of the waste water
- Slip resistant base when mat removed
- Wells silver ion content to stop bacteria growth

The flooring would be butted against the edge of the Flush Fit tray and joined with a suitable flexible sealant. Alternatively vinyl flooring may be let under the front lip.

Floor Line

Shower Tray

Our Floor Line Shower Tray offers an accessible showering solution to those who require assistance in the showering area. The tray is made from heavy GRP construction for strength and durability ensuring confidence in quality. The tray is handed with a left or right corner waste for flexibility and a tiling lip on two edges which provides a tiling guide to ensure an anti-leak system when a level access finish is required.

Ideal for installation into either a timber floor, or bedded into an existing concrete floor. With a durable brilliant white slip-resistant base, the Floor Line Shower Tray is an ideal option for achieving level access.

When used with our Pro-door, half height shower door options, this provides a totally clean and stylish look to a shower room. Floor line Shower Trays are available in a wide range of sizes to suit all bathrooms and are suitable for gravity or Phlexiflow pumped wastes.

Features and Benefits:

- Durable brilliant white slip resistant base
- 50mm tiling upstand incorporated within the tray
- Gel coated for hard wearing and ease of cleaning
- Fully encapsulated board structure for increased stability and comfortable handling
- Suitable for level and low access
- Waste outlet suitable for gravity, Phlexiflow and Hydro-Flow pumped systems, including top exit
- Waste position right/left rear corner
- Waste uncut
- Wells silver ion content to stop bacteria growth

Installation

Timber

The Floor Line system can be installed into an existing timber floor by removing the floorboards and setting the tray onto the joists and in-fill panels. The tray will then be brought level with the existing floor with plywood to make the whole shower room level.

Concrete

The Floor Line system can be installed into an existing concrete floor by removing the screed. When all pipework is complete the shower room floor area can be covered with a suitable vinyl or tile flooring. The flooring should be butted against the edge of the Floor Line tray and joined with a suitable flexible sealant.

Nova

Low Profile Shower Tray

Our collection of Nova, low profile, shower trays is one of our most attractive, sophisticated looking ranges with a minimalist appeal that immitates a sought after wet room, but with the reassurance of a visible shower tray. The architecture of the clean lines and low profile makes Nova the ideal choice for users that require accessibility and an inclusive, minimalist design.

Nova low profile trays consist of 45mm high trays manufactured from cast resin stone for the ultimate in durability. Ideal for use with approved power shower systems, accepting a flow rate of 25 litres per minute.

The product is manufactured from ABS capped acrylic stone resin and double skinned for extra strength and durability.

The optional tile upstand feature helps to create a watertight enclosure, be it a new or existing installation.

Features and Benefits:

- Durable brilliant white finish
- Option of tiling upstand
- Gel coated for hard wearing and ease of cleaning
- Suitable for level and low access
- Waste position right/left or rear corner
- Anti-microbial content to stop bacteria growth
- Resin stone construction for added strength
- Pumped wate option available
- Riser kit available for unbreachable floor installation

Pro-Doors

Shower Door System

Our half height Pro-Door system enables easy level access for family members and carers. Our quality constructed, half height shower door system is available in a variety of configurations and sizes for use in wet rooms and shower areas.

Pro-doors are manufactured to a high standard using a robust aluminium frame that ensures the highest level of safety, reliability and confidence. The product incorporates stylish, rounded profiles offering a complete white clean finish to all component parts. This versatile system is available in many configurations to maximize space and suit the user's needs. Door styles for both front and corner entry are available in single folding doors, sliding doors, bi-folding doors, tri-folding doors and fixed panel options. An extended compensator is available which allows a further 35mm adjustment (total 65mm). Doors are available as half height (750mm) as standard although bespoke sizes can be made to order. The fixed panel options are supplied with 2500mm uprights complete with wall compensators, to allow fixing to both the tray, floor and ceiling. Our Pro-door system is compatible with most trays and wet floor installations in the catalogue.

This adaptor allows the floor to ceiling post (H section) to be taken across the top of the shower area and be securely fixed to an upright wall. Ideal for where the ceiling is too high or when a suitable fixing position cannot be guaranteed.

The simple addition of our Window Spanning Kit allows a wall fixing for a shower curtain track, or a wall bracket from one of our Pro-door options, to be fixed where a window would otherwise obstruct their installation. Our Window Spanning Kit also doubles up as a curtain track, with hooks and gliders.

3 Point White Seal

Labyrinth Joint System

Rising Butt Hinge

Locking System

Lifetime Warranty

Features and benefits:

- 2 elongated holes to connect compensator to wall, this allows 7½° of adjustment to assist straight install
- Compensator has 30mm of adjustment, this allows adjustment to overcome any wall imperfections
- Extended compensator available (65mm adjustable)
- Simple, single screw locking system within the door and compensator to grip the doors into position
- Can be installed and adjusted by one person
- Improved strengthened rounded hinge. Stylish and safe (no sharp edges)
- Aluminium box construction. Strong, hard wearing
- Clean, white corner pieces rubber panel seals
- P.E.T.G. (Police riot shield material) panel strong & safe, will not break into shards
- Rounded bi-fold door locking system stylish & safe (no sharp edges)
- Labyrinth seals between bi-fold & doors, stopping water ingress
- Each door has 8 concealed neodymium magnets for a strong seal (no unsightly black strips)
- 3 Way seal on base of doors for excellent water seal
- Rising butt hinge has an extended foot that is secured for extra stability to the tray or former
- Rapid rise and fall hinge system stops wear on seal and allows easy movement of doors
- Each set of doors is supplied with a curtain rail and curtain(s)
- Improved strengthened in hinges

Installation

Shower Tray

Wet room

Most Pro-doors can be opened both inwards and outwards, this will allow water droplets to fall onto the shower tray rather than on the floor. Pro-doors are not recommended in installations where power showers or outlets produce a large volume of water. It is therefore important to give some consideration as to the most appropriate positioning of the wall posts and doors. This will ensure maximum water retention within the showering area. Where Pro doors are being installed into a wet room, the choice of curved or straight wall compensators should be considered depending on whether the floor covering such as vinyl will be fitted into tile capping at 100mm from the floor.

Showers

Electric and Thermostatic

N&C Phlexicare offer the most comprehensive range of both electric and thermostatic mixer showers with safety in mind. Hot water temperature is controlled and stabilised to avoid the potential for scalding. Thermostatic temperature stability, easy use controls, colour contrasted covers, tactile raised areas and extended riser kits are some of the extra features provided in our electric shower offer. Whilst manufacturing our own dedicated healthcare mixer showers, we also work closely with brand leaders, such as Triton, Mira and Redring to provide our customers with maximum choice.

Reducing the thermostat temperature on the boiler can be harmful to users as water systems can nurture a bacteria in water temperatures between 20-45°C which can cause Legionnaire's disease. As the water temperature rises above 60°C, the majority of legionella is killed within minutes. However the risk of scalding through high water temperatures can create a risk to vulnerable people. As a result, selecting the correct showering system is paramount to ensure the safety of users and avoid potential injuries gained through scalding, where users may not be able to react quickly enough to avoid serious harm.

We offer a range of Thermostatic Mixing Valves (TMV) for efficient blending of hot water (stored at temperatures high enough to kill bacteria) with cold water to deliver a constant and safe, outlet water temperature to baths and basins to prevent scalding.

TMV 3 - For use in high risk environments, hospitals, nursing homes and schools
TMV 2 - Domestic homes, housing associations, local authorities, housebuilders and hotels

Triton Omnicare Design Grab kit 8.5KW/9.5KW

Omnicare is proof that you can have a shower which is not only stylish but can be easily used regardless of the level of assistance required.

- Thermostatic temperature - Regulates water temperature within +/-1°C
- Audible feedback and tactile temperature dial with soft grey tones offers assistance to visually impaired users
- Reinforced riser rail kit designed to withstand up to 150kg support load, for optimum safety and support
- A soft press start/stop power button and looped lever handle

Mira Vision Shower Mixer

The Mira Vision is a mixer shower with a difference.

This wireless remote controlled shower valve allows you to warm-up the shower from your bed; set the eco-mode to limit shower time; plus many more features all at the touch of a button. The shower unit can be rear or ceiling fed

- Quick & Easy to fit
- Wireless technology
- Push fit connections
- Flexible installation, any system, any position
- Rear or ceiling fed options
- Pumped or high pressure
- Thermostatic safety and maximum temperature setting
- Digital display – temperature or time

Mira Vision Wireless Controller, Access to program menu via front panel keys on user interface. All settings e.g. maximum temperature, adjusted on the control panel

Mira User Interface has simple, easy to use buttons:

- On/Off button
- Flow control buttons
- Temperature control buttons
- Clock / Temperature display
- In eco mode, shower time and flow rate limited

Gravity Wastes

The majority of shower trays and floor formers installed into bathrooms or wet rooms/zones rely on standard gravity drainage. However different site conditions and depths of trays, formers, screed etc. require a selection of drainage options.

Phleximax 50 Gulley

The Phleximax system is suitable for both vinyl and tiled floors. It is also 100% compatible with the Premier Shower Deck.

Phleximax 50 Two Part Gulley

Phleximax 50 - for wet floors

The Phleximax 50 is a multi-purpose drainage system for both concrete and wooden wet floor installations. Suitable for both vinyl and tiling. The overall diameter is 200mm, with a visible diameter of 120mm and flow rate of 48 litres per minute. Overall height is 76mm with an outlet diameter of 50mm. Supplied complete with adapter.

Product	Code Number
Phleximax 50	P6882441

Phleximax 50 Vertical - for wet floors

The Phleximax 50 Vertical is the same system but with a vertical outlet which allows a straight through floor drainage option. The overall diameter is 200mm, with a visible diameter of 120mm and flow rate of 48 litres per minute. The overall height is 189mm with an outlet diameter of 50mm. Supplied complete with adapter.

Product	Code Number
Phleximax 50 Vertical	P6882398

Phleximax 50 two part - for wet floors

This two piece gulley can be used in all floors but has been specifically designed for use with timber floors and Floor Formers and can be plumbed prior to the installation of the floor or Former. Supplied complete with adapter.

N.B : Height of standard Phleximax 50 P6882441 is 76mm. Height of Phleximax two part is 89mm

Product	Code Number
Phleximax 50 two part floor gulley	P6882471

Vinyl Form - for wet floors

The vinyl form wetfloor shower gulley has a visible diameter of 120mm, 197mm overall. It is 117mm high and has a flow rate of 48 litres per minute. Supplied complete with adapter.

Product	Code Number
Wetfloor Shower Gulley	P6820599

Phleximax S-Series 59mm - for wet floors

The 59mm Phleximax S-Series floor gully is suitable for both vinyl and tiled floor finishes. This gully is incredibly shallow, with a total height of 59mm which fits into shallow concrete slabs. With this type of gully you can avoid having to install a vertical outlet. Can not be used with shower decks.

Product	Code Number
S-Series 59mm	P6882488

Grating for floors - stainless steel

We have a variety of stainless steel grates available which are made to suit the Phleximax S-Series 59mm gully. The rounded 150mm diameter drop grate shown below is suitable for vinyl floors only, whereas the squared 200x200mm grates shown on the right hand side are suitable for tiled floors only.

Phlexiknife

A tool for the professional craftsman when connecting a vinyl floor or tanking system to the Phleximax floor gully. P6882441. When using the waterproof pipe collar this tool should be used to cut the perfect circle for securing into the Phleximax gully system, alternatively it can be used for cutting vinyl prior to securing into the Phleximax 50.

Product	Code Number
Phlexiknife	P6882445

1. Place the foot of the Phlexiknife in the gully.

2. Lay the vinyl over the foot and press until the pivot pushes through.

3. Attach the arm of the knife to the pivot and cut out the hole.

4. Remove the foot of the Phlexiknife in the gully.

5. Heat the vinyl.

6. Put the clamping ring in place with the text facing upwards. Place the grating on top and press down.

Product	Code Number
Untrapped Shower Gulley USG1	S2370515

90mm Waste - for shower trays

A 90mm rapid waste outlet that allows 48 litres of water to be carried away each minute. Its sleek lines perfectly complement the range. Made from recycled material. Conforms to BS EN 274-12002.

Can be used with our Nova Low Profile Shower Trays.

Product	Code Number
90mm Waste	S2220129

Gravity Waste Trap - for shower trays

A unique design of top access, combined waste and trap, for easy cleaning and maintenance. Only 50mm deep with a flow rate of 22ltr per minute.

This trap has been specifically designed for our Easy-Fit range of shower trays. 50mm high. 38mm outlet.

Product	Code Number
Gravity Waste Trap	S2370502

Gravity Waste Trap - for shower trays

This carefully designed waste fitting can be accessed from the top of the shower tray for easy cleaning and maintenance.

This waste fits the Universal, Multi-Fit, Floor Line and Flush Fit trays. 90mm high. 38mm outlet.

Product	Code Number
Gravity Waste Trap	S2370501

Waste Trap - for Trimline Shower Trays

Flow rate minimum 24 litres per min.

This minimalistic shower gully is designed to fit flush within the Trimline tray so as to give a seamless connection across the base of the tray. 90mm shower trap with a 50mm seal.

Product	Code Number
Waste Trap	S2220183

Pumped Wastes

Where gravity drainage is not an option, it is necessary to install a pumped shower waste system. However consideration should be given to the site circumstances as to which option is the most suitable.

Whale Pumped Waste Systems

Gravity drainage is not always an option when fitting a level access shower base, for example in apartment blocks. Whale provide a reliable, proven solution for waste water removal. Using a small bore pipe, waste water is removed up from the shallow gully and raised by the pump into the existing waste system.

Features and Benefits

- Robust performance
- Hair, gels, grit and other shower waste pass through the pump without blocking
- Maintenance free -
No in-line filter is required therefore no internal cleaning is necessary
- Practical design -
Valves, integral to the pump, prevent odours escaping into the bathroom from the drainage pipe
- Versatility -
May be used with level access formers, screeded floors or shower trays
- Purge function -
Once the shower is switched off the pump automatically reduces speed as residual water is removed from the gully area. 15mins later the pump reactivates to remove pooled water

Whale Instant Match Digital Bluetooth

To minimise gulley suction noise the Whale Instant Match uses a digital signal sent from the Mira Advance Extra to automatically adjust the pump speed in relation to the flow rate of the shower.

- No set-up required -plug and play
- Variable pump speed, tracks the flow rate of the Mira Advance Extra / Triton Omnicare
- No flow sensor / flow switch to fit
- Whale wet floor Whisper Gulley included as Standard

Note: For installation with any electric shower a Sika Flow Sensor can be fitted in-line.

Product	Code Number
Sika Flow Sensor	P6821643

Whale Standard

The original automatic shower drain kit with proven reliability is now combined with additional fixed pump speed settings (12), Active-Link diagnostics and Whale Whisper Gulley options.

- 12 adjustable pump speed settings designed for electric and mixer shower
- Integrated flow switch and filter
- Wet floor kit includes Whisper Gulley
- Draws 3 metres from gulley Lifts 0.5 m Pumps up 1 metre
- Small pump and transformer will fit into tight spaces

Note: For mixer shower installations an additional flow switch and flow reducer is available (Mixer Valve Conversion Kit).

Product	Code Number
Flow Switch	P6821597

Whale Digital Smoothflow

The Digital Smoothflow Kit is designed to minimise gulley suction noise by precisely matching the pump flow rate to the shower flow rate.

- Variable pump speed - commissioned to each specific installation
- Variable speed ensures quiet operation of the system
- Suitable for electric and mixer shower installations
- Whale wet floor Whisper Gulley included as standard

Note: For mixer shower an additional flow sensor is required.

Product	Code Number
Mixer Valve Conversion Kit	P6821628

Whale Instant Match Premium System

The Instant Match Premium is designed specifically to solve shower drainage problems in modern wetrooms, allowing you to create your ideal bathroom without compromise. Allows you to easily achieve a step-free showering area in your new en-suite bathroom, wetroom, or converted loft space.

- Quiet operation with built in anti-vibration mounts.
- Acoustically tested
- Latest Switch Mode technology in transformer
- Lightweight all in one unit
- Plug and Play operation
- Standby power 0.45W

Product	Colour	Code Number
Instant Match Premium	White	P6821641

Suitable for use with our Universal, Floor Line and Flush Fit trays.

Whale Automatic Shower Tray System

This option is supplied with a flow switch, which should be located in the water supply line to the shower. When the shower is turned on, the pump starts automatically. The pump will then turn off automatically after the over-run when the shower is turned off.

One flow switch is required if used with a single supply of water. Where two water supply inlets are used a second flow switch must be fitted to enable the pump to operate effectively (available as part of the Mixer Valve Conversion Kit AK1570 P6821628 which also includes a flow reducer)

Product	Colour	Code Number
Automatic Shower Tray System	White	P6821590

Suitable for use with our Universal, Floor Line and Flush Fit trays.

Whale Automatic Wet Floor System

This option comes with a flow switch for automatic operation and is suitable for wet floor installations.

The system comes complete with pump, pump cover, transformer, 200mm dia. x 35mm deep bottom waste and pipe fittings. Pump cover size - 340mm high x 180mm wide x 130mm projection

Note: For mixer shower installations an additional flow switch and flow reducer is available (Mixer Valve Conversion Kit) P6821628

Product	Colour	Code Number
Automatic Wet Floor System	White	P6821589

Suitable for use with our Premier Shower Deck floor former or other wet floor areas where vinyl sheeting is used.

Whale Digital Smoothflow Tray and wet floor

The Digital Smoothflow tray and wet floor kit is designed to eliminate gulley suction noise by precisely matching the pump flow rate to the shower flow rate.

This system may be purchased as a complete kit including the control unit, tray & wet floor waste and pump. Suitable for electric and mixer shower installations for flow rates of up to 12ltrs per minute. Whale wet floor whisper gully included as standard.

Note: For mixer shower installations an additional flow sensor is required P6821643

Suitable for use with our Premier Shower Deck, Universal, Easyfit, Flushfit and Floorline trays.

Product	Colour	Code Number
Digital Smoothflow	White	P6821582

Whale Instant Match Digital Bluetooth Tray and wet floor

To minimise gulley suction noise the Whale Instant Match Digital Bluetooth® uses a digital signal sent from the Mira Advance Extra to automatically adjust the pump speed in relation to the flow rate of the shower. Variable Pump Speed, tracks the flow rate of the Mira Advance Extra.

No set-up required – plug and play. No flow sensor / flow switch to fit. Whale Wet Floor Whisper Gulley and tray gully included as standard. The Whale Instant Match Digital Bluetooth is also compatible with the Triton Omnicare.

Note: For installation with any electric shower a Sika Flow Sensor can be fitted Inline P6821643

Suitable for use with our Premier Shower Deck, Universal, Easyfit, Flushfit and Floorline trays.

Product	Colour	Code Number
Instant Match Digital Bluetooth	White	P6821576

Shower Seats

Important features of a bathroom are often overlooked. A shower seat, whether placed in the shower area or in the shower room itself is a key element for comfort and safety. Our shower seat range allows a choice of wall mounted and height adjustable seats that can be fixed or folded back. Various sizes and styles allow a traditional or contemporary look to be achieved and complement the rest of the bathroom furniture.

Made from high quality materials and manufactured to EN and British standards, all our seats are easy clean and maintenance free. The diversity of the range means varied levels of support can be accommodated as well as differing budget requirements.

Technical Details:

- A = Overall width
- B = Overall depth
- C = Seat width
- D = Seat depth
- E = Height adjustment
- F = Maximum weight

Our range of shower seats can be used in many varied showering applications, both inside and outside of the showering area.

As these seats are wall mounted consideration should be given to the type of fixings used to secure them.

The appropriate fixings (not supplied) to suit the wall construction should be used and advice is available from your local depot.

Classic Shower Seat - with backrest, arms and legs

The Classic folding seat shower seat has proven to be one of the most popular shower seats available in the UK. The seat is height adjustable enabling it to be set at various heights to suit the user. The legs have fine adjustments to compensate for any variations in the shower tray and the arms lift independently enabling safe and controlled transfer. The frame is manufactured from rust free aluminium and the clip-on seat is injection moulded making it an excellent solution for long term maintenance free use.

Total wet room solutions

in five easy steps...

1 Wet Floor Former

Our Premier Shower Deck is an easy to install, robust floor former that can be tiled directly onto. It creates a level access floor into the shower area and assists the flow of water to the drain

2 Drainage

Opt for either standard or linear drainage with a tile insert option, or from a selection of our stylish stainless steel gratings

3 Tanking System

Create a watertight environment with total confidence by using our complete tanking system which includes easy to use self adhesive collars and waterproof tape

4 Shower Screens

Select from our attractive range of modern toughened shower screens available in a range of sizes for any room size

5 Tiles & Accessories

Choose from our huge range of on trend wall & floor tiles, undertile heating and bathroom accessories

Components manufactured to work in harmony for a leak free solution with confidence

Premier Infinity

Shower Deck

**Unique waterproof revolutionary factory fitted sliding drain system.
Experience Luxury with the Invisible Infinity Deck System**

Our N&C Premier Infinity Deck is a revolutionary shower deck with a unique, factory-fitted waste outlet which can be moved along by the installer to align the waste in the correct position. The sliding action of the outlet means that the deck can be sited in a convenient position where obstacles such as a joist can be avoided.

The deck also features a unique waste removal system, which means that the finished result is an invisible, seamless and highly attractive waste system that is discreet and attractive. The precision engineered single direction gradient, complemented by the stainless steel edge allows for the high volume removal of waste water.

This is a highly innovative approach to linear decks where we offer a practical, attractive and fuss free alternative to other conventional linear drainage systems.

Features and benefits:

- Factory fitted waste outlet for total confidence of a leak free connection
- Moveable waste to avoid joists in the floor during installation
- Against the wall invisible drainage system that allows for seamless, unobtrusive water removal
- Comes with a drain insert that can be tiled
- Manufactured using high strength precision metal moulds
- Strong & durable made from 50% recycled material
- Built-in 12.5mm upstand
- Can be tiled directly on to
- Avoid envelope cutting of tiles as system uses single, gradual slope
- Built in gradients for water removal to the waste
- Ideal for total level access
- Self supporting, no additional support
- Accepts 470kg point loading

With threaded waste outlet

Premier

Linear Shower Deck

The Premier shower deck is the perfect solution for a total level access wet floor showering area. It is self supporting and made of 50% recycled materials and is 100% recyclable.

The Premier Linear Shower Deck is ideal for creating a level access shower area with ease. As the strongest available floor former in the UK market, accepting up to 470kg, the robust structure is manufactured using high precision moulds for strength and durability. With a self supporting structure, Premier Shower Deck can be placed directly onto underfloor joists without the need for additional support.

Our Premier Linear Shower Deck is the perfect solution for use in wet rooms. With built in falls, the gradients in the deck encourage the swift removal of waste water.

Designed with easy installation in mind, Premier Linear Shower Decks can be installed into existing concrete or timber floors. Offset waste outlets have been designed to avoid joists (in most circumstances) for easier access to the pipework.

Our Premier Shower Decks are easy to install and can be tiled directly onto. Although several sizes and formats are available, it can also be trimmed by up to 60mm on each edge for onsite flexibility making installation easier.

Features and benefits:

- Strong and durable base made from 50% recycled material
- 22mm profile
- Can be tiled directly on to or covered in vinyl
- Built in gradients for water removal to the waste, minimum 2%
- Ideal for total level access
- Waste offset to avoid joists in most circumstances
- Pre-cut waste outlet suitable for gravity waste
- Self supporting, no requirement for additional support underneath
- Can be trimmed by up to 60mm on each edge
- Accepts over 470kg loading
- Manufactured using high precision metal moulds

The Premier Shower Deck's 22mm profile allows easy installation into either timber or concrete shower areas.

Lifetime Warranty

Installation

Timber

Concrete

The Premier Shower Deck can be installed into an existing timber floor by removing the floorboards and fixing the former directly onto the joists. If the deck protrudes more than 100mm over a joist, support noggins should be installed. The floor should be brought level with the former to make the room level and ready for a suitable floor covering.

The Premier Shower Deck system can be installed into an existing concrete floor by removing the screed and setting the floor former in a position to leave it level with the remainder of the shower room floor. When all pipework is complete the whole shower room floor, including the new shower area can be covered with suitable vinyl flooring or tiled.

Tiles

Select your tiles & shower fittings from the N&C range.

Shower Screens

N&C shower screens offer an attractive and contemporary look to your Wet Room.

Wet Room Tanking System

Use Nicobond Wet Room Waterproofing Membrane, Tanking Sheet & other components to create a fully waterproofed Wet Room environment.

Drainage

A choice of Phleximax or Phlexiline living drainage with a stylish selection of stainless steel covers.

Shower Base

The Premier Shower Deck is a totally waterproof and robust floor former which can be laid directly onto suspended joists or inlaid into a screed.

Finesse Two

Wet Room & Shower Screens

This frameless, elegant design will enhance any showering space by enabling freedom of movement unhindered by traditional enclosure frames. When combining screens, the ability to create a stunning wet room look is easily achievable. The easy fit mobile panels can be fitted to any width screen, without the need for cutting the glass.

Features and Benefits:

- Fast and easy to install
- 8mm glass
- Clear glass
- Toughened safety glass
- Free standing and corner wall versions
- Profiles in chrome
- Wall support included
- Reversible
- The 6mm mobile panel compatible with every screen option
- Flexible seal
- Suitable for wet rooms and trays

Speed of Installation

The glass panel is secured with a flexible seal.

Modular System

The mobile panel is attached by a unique clamping hinge providing limitless flexibility.

Finesse screens are manufactured from 8mm toughened safety glass in accordance to BS EN12150 Screens and Enclosures. Finesse is tested in accordance with EN14428 Shower Enclosures, Functional Requirements and Test Methods.

Finesse allows an almost limitless amount of options allowing you to create your perfect wet room look.

Select your style and size from the following pages, to create your ultimate wet room experience.

Transform

Shower Screens

Transform encompasses a shower enclosure with a modern design and attractive bi-fold doors that incorporates a unique pivot safety mechanism. The pivot safety opening is guided by an innovative magnetic release. In day to day operation, the bi-fold door would fold inwards to accommodate a small bathroom. However, should a fall or accident occur, the quick pivot operation of the shower door will act as an emergency release feature to prevent harm from full contact with a glass door. A low threshold door, with a square edge chrome finish and anti-limescale treatment supplied as standard, makes transform the ideal choice for elegant, safe showering.

Features and Benefits:

- 6mm glass
- Toughened safety glass
- Attractive chrome finish
- Pivot release safety mechanism
- Low profile threshold bar
- Suitable for tray or wet floor installation
- 60mm adjustment for out of true walls
- Anti-limescale treatment included as standard

Fluidity

Sliding Shower Screen

The Fluidity Sliding door shower system is an elegant looking, contemporary shower screen system that features a seamless soft close, sliding door. Fluidity encompasses all the features and benefits of a traditional shower enclosure but without a floor channel, thus allowing barrier free entry into the shower area. Its unique soft close door system allows the gentlest of touches in order to move the door when opening and closing. Fluidity is a versatile range that enables a variety of configurations to be created to better suit the users' requirements.

Features and Benefits:

- Easy to install
- Profiles in chrome
- Toughened safety glass
- Clear glass
- Clear scale treatment as standard
- Unique soft close mechanism
- Barrier free entry
- Fixed panels 6mm. sliding panel 8mm
- In-line and corner entry

Freespace Two

Shower Screen

This new generation shower screen has been created and designed with the whole family in mind. The ideal showering solution for those who can shower themselves and those who may require assistance. Simple and easy to both install and operate, it is elegant and practical and allows the whole shower area to be opened up when not in use. This is an ideal solution for a multi-user situation where it is important to have inclusiveness and aesthetic appeal.

Features and Benefits:

- Inclusive design
- Polished chrome finish
- Unique folding doors allows creation of space
- In-line and corner entry available
- Unique spring handles achieve split screen function
- Rising hinge system on both folding panels
- Toughened safety 6mm clear glass
- Easy to fit
- Full height and reduced height versions

Wet Room Drainage

Phlexiline Living & Phleximax Systems

The Phlexiline Living and Phleximax Systems are innovative designs that have been created with style and ease of installation in mind. Whether onto concrete, timber or Premier Shower Deck everything is supplied in one box and enables a stunning Wet Room look.

Simple selection

1. Choose your size
2. Choose your grate style
3. Choose your gulley

The code chosen is all you need, with everything in one box to install your wet room drainage.

Features and Benefits:

- A unique waterproof clamping system for tiled floors.
- A built in spring loaded odour trap ensures the gulley remains air tight, gas tight and water tight even if the trap is empty.
- All components supplied for concrete, timber or Premier Shower Deck installation.
- Packers for 22mm flooring.

When using these products for tiling a wet room, the tanking products on pages 150 - 151 must also be used. Our Premier Shower Decks are featured on pages 116 - 120.

AquaMagic

Bath Replacement Shower

AquaMagic is our revolutionary range of self contained shower cubicles, that encompasses innovation, style and performance. Designed with users in mind, AquaMagic features a cool touch shower, leak free construction as well as the option of an anti slip tray, secure grab rails and a comfortable fold down seat. Furthermore, the easy installation means that replacing an old bath or shower is easier than ever before.

Features and Benefits:

- Inclusive design
- Side and back panel, 6mm toughened glass, front panel and door 8mm
- Anti-limescale treatment as standard
- Leak-free showering
- 30mm low profile tray for easy accessibility
- Cool to touch, thermostatic shower
- Suitable for corner or recess installation
- Fuss free, easy installation
- No silicone required
- Replace an existing bath in a day
- Anti slip finish available

AquaMagic +

The low profile, anti-slip shower tray, cool touch thermostatic valve and other safety features such as the support grab rail and fold down shower seat (accepts upto 150kg) makes AquaMagic + the optimum solution for accessible showering.

- 5** Provides lateral transfer, powered traverse and leg raiser to carry legs over the bath side

EcoTub

Shallow Bath

Our standard bath tubs hold 150 litres of water. With water saving having become a priority in recent years, N&C have manufactured an eco-friendly product range to help with reducing water usage/consumption. The EcoTub helps reduce the impact on the environment, whilst also providing the shallow easy access option of a traditional bath tub.

Features and Benefits:

- 1700mm length
- 430mm high
- 300mm tub depth
- 110 litre capacity
- Save up to 40 litres of water on every fill
- Shallow depth aids entry
- 5mm acrylic fully encapsulated base board

Product	Code Number
EcoTub 1700	S7006166
Front Panel 1700	S7006518
End Panel 700	S7006519

Steel Baths

Lowline

This low line bath has a minimum height of 450mm and maximum 480mm which makes it easier to step into and out of than conventional baths. Ideal for those who have difficulty getting in and out of a standard bath. Alternatively, our low line bath can be used where water conservation is required.

Features and Benefits:

- Interior finish has two coats of high quality vitreous enamel
- Exterior finish has one coat of rust proof vitreous enamel
- Anti splash bath rim
- Reduced height for ease of entry and exit
- Surefoot patterned shower base
- Adjustable metal cradle
- Water capacity:
1500 Bath 105 litres at 180mm depth
1700 Bath 120 litres at 180mm depth

Bathing Cushion Bath Lift

An easy to use solution that lowers users gently into the bath. Once there they can opt to have cushioned back support, or release all the air to lie right back and bathe as normal. After bathing, it can be re-inflated using the Airflo compressor to lift the user steadily back up, level with the top of the bath. The Bathing Cushion bath lift is designed to offer increased stability and comfort. Weighing only 2kg (4.4lbs) and featuring a carry handle, it is portable making it ideal for taking away on visits or on holiday. It can also be set up or removed in seconds and requires no fixtures or adaptations to an existing bathroom. Note: This product is only suitable for users with good upper body stability.

Easy Fit Frame

Bath Panel Support Frame

The N&C Easy Fit bath panel support frame is our innovative, new system for the easy, fast and cost effective solution to installing baths. The N&C Easy-Fit Frame is a revolutionary solution for bathroom installers negating the need for timely, costly timber frame constructions.

The traditional method of fitting a bath panel to a bath tub involves a timber frame being constructed to support the bath panel that involves a skilled carpenter, heavy material, additional costs and time.

Features and Benefits:

- Saves time and money
- No trade skill needed
- Fully adjustable
- Manufactured from ABS
- Re-useable
- Pre drilled feet at 45° angle for ease of installation
- Fits 70% of UK bath tubs and all types of bath panels including tiled

Fully adjustable front frame

Shower Toilets

The shower toilet system is perfect for those who wish to maintain independence and privacy in the bathroom. The shower toilet combines all the functions of a conventional W.C. and bidet with the comfort of warm-air drying.

Water possesses qualities which have a noticeable effect on our well-being: it refreshes, revitalises and cleanses. You will not just be captivated by the water alone but also by the sophisticated spray principle, combined with specific individual functions.

Discover a new kind of personal hygiene that is gentle, natural, and good for you.

Imagine you are fitting the bathroom of your dreams, what would you like? More relaxation, more comfort, more design?

AquaClean Mera Care - Floor mounted

The Aquaclean Mera Care is a shower toilet which blends perfectly into all bathroom environments, with its sleek design. The WhirlSpray power technology allows for a thorough clean, whilst being incredibly gentle with a supply of warm water.

Aquaclean Mera Care

- Orientation light in a range of colours
- Touchless automatic mechanism for the WC lid
- WC seat heating
- Odour extraction
- WhirlSpray shower technology with five adjustable shower pressure settings
- Gentle cleaning lady wash
- Warm air dryer with adjustable temperature
- Rimless ceramic pan with TurboFlush technology
- Handy and clearly laid-out remote control
- Monolith frame
- Barrier free mode
- Simple to use remote control with four functions
- Continuous 1 minute warm wash - duration can be altered if necessary
- Pre flush
- Automatic de-scale
- Toilet seat lid available as an extra

Product	Code Number
Aquaclean Mera Care	P1400021

Mera Care Remote

Manual flushing can be activated by pushing the new flush button on the remote for a full flush

Mera Care Wall Panel

Touchless wall control panel – easy to activate panel with only one sensor button to start the shower program including flush

Mera Care Whirlspray

Five adjustable shower pressure settings Adjustable spray arm – the position of the spray arm and the intensity of the pulsating shower spray can be personalised

Cleaner and more hygienic

Take advantage of the gentle flow of air provided by the integrated warm air dryer. Powerful built-in odour extraction technology removes unpleasant smells

AquaClean Mera - Wall mounted

AquaClean is a toilet which has elegantly been designed with a host of convenient features as standard. Promoting a unique sense of wellbeing that will benefit every age group this choice is great for a family bathroom where there will be multiple different kinds of users.

Product		Code Number
AquaClean Mera	White Apine	P1400036
AquaClean Mera	Gloss Chrome	P1400037

Perfect cleanliness

The oscillating spray gives you an extraordinary feeling of cleanliness. With this function, the water spray moves back and forth in a regular motion, guaranteeing a particularly thorough clean.

Invigorating massage

The massage spray ensures a beneficial relaxing experience. The pulsating water spray feels pleasant and produces a stimulating effect.

Pleasant freshness

The odour extraction function has a beneficial effect for all the senses. It starts automatically as soon as someone sits down on the toilet. This prevents any unpleasant odours from circulating around the room.

Remote control

Using the remote control, you can set up your own personal pampering programme in no time – and activate it again at any time at the touch of a button. Up to four people can save their preferred programme on the remote control.

Duofix Frame - For wall hung W.C.

Toilet Seats

N&C Phlexicare offer a wide selection of toilet seats, either with or without covers to suit our range of W.C. suites. Some of the special features incorporated in our range include, retaining buffers, which are located within the rim of a W.C. pan to stop sideways movement during wheelchair transfer, strong stainless steel cross bar hinges for durability, antibacterial coatings to aid hygiene and soft close action for smooth seamless closing of the seat and cover.

Designed for easy clean

Strong stainless steel cross bar hinge

Retaining buffer prevent lateral movement

Soft close action

SafeFlush

Every time your toilet is flushed, whether the seat and lid are up or down, a fine mist containing micro-organisms is spread throughout the bathroom.

The double seal on the SafeFlush seat creates a seal between the lid and seat as well as the base of the seat and the bowl, helping to ensure that germs and bacteria are kept where they belong.

Advanced - Toilet seats

Stainless steel hinge & retaining buffers.

Wash Basins

Wall and Pedestal Mounted

N&C Phlexicare wash basins are manufactured to a high quality and tested rigorously prior to their availability in the market. We offer a variety of wash basins to suit users needs, such as our wall fixed models to allow ease of access for wheelchair users or an easy to use, moveable swing basin. The majority of our washbasins, with bolt fixings, can also be mounted on adjustable height basin assemblies for multi user environments. We offer a range of pedestal and semi-pedestal mounted basins in our range with basins starting from 400mm up to 760mm wide to suit the space available within the bathroom or washroom.

Modern designs with wheelchair accessible basins and easily operated taps and mixers

Taps & Mixers

Taps and mixers are the vital components which allow delivery of water to be achieved in all bathrooms. The operation of the taps and mixers within a healthcare or elderly person's bathroom or kitchen determine the ease of use, and therefore suitability of the fittings installed.

We are able to offer a huge selection of styles, designs and operational options to suit all abilities. We can provide traditional lever taps with 75mm or 125mm operating handles to aid and assist in functionality, as well as easy to operate more modern and design conscious products which lift the look of any bathroom.

Safe delivery of hot water to the bathroom is also an emotive subject, in the healthcare environment even more so, as vulnerable people must be assured that anti scald measures are built in to the taps and mixers installed. We can offer thermostatic temperature limited taps and mixers which meet the strict requirements of the TMV3 and TMV2 schemes, for safe, controlled hot water delivery to a bathroom environment.

We also provide in-line mixing valves which achieve these same exacting standards, and allow the specifier to select any taps and mixers from our collection with the knowledge that using a thermostatic in-line mixing valve will control the hot water delivery to your fitting of choice.

Pressalit

CareSystem Plus - CareCompletion - CareElements

The Pressalit Care PLUS solution caters for the needs of all users with up-to-the minute design and ease of use. The entire concept of an integrated collection of bathroom and W.C. accessories and facilities revolves around the use and installation of the Pressalit Care PLUS wall track. With both horizontal and vertical adjustment options, PLUS is a complete bathroom system that makes it possible to plan, furnish and alter every single bathroom to meet requirements as they change.

CareSystem Plus

The secret behind the unique flexibility of PLUS is its track, which allows ease of movement for all. The track system enables the products to be repositioned as needed. This makes the solution adjustable to specific situations and specific needs. With the various products available, a complete solution for the bathroom can be created. Add Pressalit Care PLUS' series of complementary products to create a complete solution for the bathroom.

CareCompletion

Care Completion is a series of functional bathroom solutions which provide a pleasant and safe environment for people who need extra help with their daily routines in the bathroom. The products are made of materials which are robust and resistant to cleaning agents as well as to moisture and high humidity levels. The design takes account of current ergonomic and hygiene requirements while ensuring high standards of user comfort.

CareElements

CareElements provides an overall solution for the bathroom with a range of single elements. It is the perfect solution if full flexibility between bathroom functions is not required or possible. Furthermore, a range of special products is available to fulfil the needs of a particular group of users.

Adjustment Options

Pressalit Care PLUS is a product and interior design system that gives the freedom to plan a bathroom that answers the current needs precisely. With the track system, the design can be changed and expanded if the conditions change.

Products on horizontal and vertical tracks

The products can be adjusted horizontally along the track and vertically in height. They can be:

- **Totally removed or replaced**
- **Repositioned along a track**
- **Added to or exchanged for other products**

Products on horizontal tracks

The products can be adjusted horizontally along the track. They can be:

- **Totally removed or replaced**
- **Repositioned along a track**
- **Added to or exchanged for other products**

Products on vertical tracks

The products can be adjusted vertically in height. They can be:

- **Totally removed or replaced**
- **Repositioned along a track**
- **Added to or exchanged for other products**

Fixed products

The product cannot be adjusted.

<p>Max. Load Support arm: 255kg Shower chair: 300kg Folding seat: 135kg Raised Toilet seats 150kg Toilet seats: 250kg Basin brackets: 100kg*</p>

*during height adjustment

Colour Options

The flexibility of the Pressalit Care PLUS system is also reflected in the wide choice of colours available. Thanks to the variety of both subtle and intense colours, it is easy to choose exactly the right colour combinations to suit the bathroom's main purpose while satisfying user needs for an aesthetic and plainly laid-out design. Please note that longer lead time on products other than the standard colours white and anthracite can be expected and that minimum order quantities may apply on special colour orders.

CareSystem Plus - Wash Basin Bracket

For mounting on horizontal wall track

When it is mounted at the recommended height, the wash basin's height can be adjusted 300 mm from 668 to 968 mm – measured from the floor to the top edge of the wash basin. P6836745 is supplied as a standard with a gas cylinder for wash basins weighing 16-20 kg.

Max load 200kg. Max load of 100kg during height adjustment. For flexible feed and waste system see page 226.

A Electric: 658mm

A Gas: 536mm

Product	Code Number
300 mm adj. height, electrically operated wash basin bracket with lever control	P6836742
300 mm adj. height, electrically operated wash basin bracket with wired hand control	P6836743
300 mm adj. height, electrically operated wash basin bracket with cordless remote control	P6836744
300 mm adj. height, gas-operated wash basin bracket with lever control	P6836745

CareSystem Plus - Wash Basin Bracket

Adjustable height

When it is mounted at the recommended height, the wash basin's height can be adjusted 300 mm within the range 668 to 968 mm – measured from the floor to the top edge of the wash basin.

As a standard supplied with gas cylinder for wash basins weighing 16-20 kg. Max weight loading 200kg.

For flexible feed and waste system see page 226.

A Electric: 658mm

A Gas: 536mm

Product	Code Number
300 mm adj. height, electrically operated wash basin bracket with lever control	P6836747
300 mm adj. height, electrically operated wash basin bracket with wired hand control	P6836748
300 mm adj. height, electrically operated wash basin bracket with cordless remote control	P6836749
300 mm adj. height, gas-operated wash basin bracket with lever control	P6836746

Electric with lever control – the button at the end of the handle is gently pushed upwards when the wash basin is to be adjusted in an upwards direction, and down when the wash basin is lowered.

Gas with lever control – lift the lever control to release the lock. Push the basin to required height. Return the lever control to a horizontal position. The wash basin is now locked into the new position.

Mounting of wash basin: Bolt-mounted basin. Basin hole spacing: Min. 50mm; max. 470mm. The bolts can be set in positions 1-2 for adjustment of wash basin on the bracket. For bolt mounted wash basin see pages 186 - 190.

CareSystem Plus - Manual Wash Basin Bracket For mounting on horizontal wall track

When it is mounted at the recommended height, the wash basin's height can be adjusted 240 mm within the range 680 to 920 mm measured from the floor to the top edge of the wash basin.

Suitable for periodic adjustment only.
Max load 200kg

For flexible feed and waste system see page 226.

Product	Code Number
240 mm adj. height, manually operated wash basin bracket with lever control. Anthracite cover plate for wall track	P6836750
240 mm adj. height, manually operated wash basin bracket with lever control. Pale grey cover plate for wall track	P6836751

CareSystem Plus - Manual Wash Basin Bracket Adjustable height

When it is mounted at the recommended height, the wash basin's height can be adjusted 240 mm within the range 728 to 968 mm – measured from the floor to the top edge of the wash basin.

Suitable for periodic adjustment only.
Max load 200kg

For flexible feed and waste system see page 226.

Product	Code Number
240 mm adj. height, manually operated wash basin bracket with lever control. Anthracite cover plate for wall track	P6836752
240 mm adj. height, manually operated wash basin bracket with lever control. Pale grey cover plate for wall track	P6836753

The lever lock is lifted at the same time as the wash basin until there is an audible click.

The height of the wash basin can now be set. The lever is re-engaged to lock the wash basin in the new position.

Track with grooves where the lock catches and the product is fixed.

Mounting of wash basin: Bolt-mounted basin. Basin hole spacing: Min. 50mm; max. 470mm.

The bolts can be set in positions 1-2 for adjustment of wash basin on the bracket.

For bolt mounted wash basin see pages 186 - 190.

CareSystem Plus - Support Arms

For mounting on horizontal wall track

When it is mounted on a horizontal track at the recommended height, the support arm's height can be adjusted 240 mm within the range 645 to 885 mm – measured from the floor to the top edge of the support arm.

Projection when folded: 250mm.
Max load 225kg

CareCompletion - Dania Toilet Seat

An ergonomically designed seat that is well suited to most people. Sideways transfer is easy because the seat is flat. The cover is comfortable to sit on, and when set upright it gives good support to the back. It is well suited to hospitals, as most bedpans fit into the bowl whilst the handle is placed in the open front. Supplied with universal hinge B82/B83.

Dania with Cover	Red	P6833816
Dania with Cover	Blue	P6833818

CareCompletion - Ergosit Toilet Seat

Large, wide sitting surface with good support. Well suited to "large" adults with digestive problems.

The bowels are stimulated by the seat's contoured surface that presses and acts on the thigh muscles and nerves.

Grooves at the back prevent adhesion.

Supplied with institutional hinge D92.

Also available with anti-vandalism hinge BZ7.

Product	Colour	Code Number
Ergosit without Cover	White	P6833301
Ergosit with Cover	White	P6833305

CareCompletion - Colani Toilet Seat

The curved bowl shape supports and stabilises the pelvis and also makes the seat well suited for children (six years old and above) with muscular atrophy. The raised side edges are easy to hold when the body needs to be stabilised. The cover is comfortable to sit on, and when set upright it gives good support to the back.

Supplied with universal hinge B82/B83

Also available with institutional hinge D92 and anti-vandalism hinge BZ7.

CareCompletion - Shower Accessories

Mixer bracket – mounting on horizontal track

1200mm feed pipes included.

The shower head holder can be mounted on the right or the left side according to need. The photo shows the mounting for a right-handed user. The shower mixer bracket fits valve fittings that have 151 mm pipe centres.

The lock handle allows for individual adjustment of the mixer bracket along the horizontal track. At the shower chair, at the wash basin – for hair washing, at the toilet – for bidet function. The spring lock features adjustable spring tension for individual adjustment.

Product	Code Number
Shower Mixer Bracket	P6836825

CareCompletion - Shower Accessories

Shower mixer

Design and a contrasting colour of the operating handles make the "wing-shaped" handles easy to see and to use. The extra long handles of the P6836015 are made of smoke-coloured plastic. Eco-temp at 38° protects against scalding. The shower mixer is heat insulated.

Can be mounted on shower mixer bracket P6836007 and the above P6836825

Product	Code Number
Shower Mixer with Thermostat	P6836014
Shower mixer with thermostat and extra long handle	P6836015

CareCompletion - Shower Accessories

Shower head

The curved shape of the handle and the weight balance between head and handle makes the shower head suitable for hands with little strength. An adjustment ring makes it easy to change the spray mode. The silicon spray jets are easy to keep free of lime. A shower hose of 2000mm and swivel joints give a big radius of action.

Product	Colour	Code Number
Shower head one spray mode	Chrome	P6836016
Shower head with three spray mode (standard, soft and massage)	Chrome	P6836017

CareCompletion - Shower Accessories

Shower head holder

The design of the shower head holder makes height adjustment easy – with one hand or hands with little strength. The angle of the shower head can be adjusted as wanted by a click-system.

Mounted on a handrail of 1000mm the shower head holder is suitable for both seated and standing users. At the same time the handrail will offer good support.

Matrix - Small Basin

Wash basin with integrated handrails

'MATRIX Small' is a narrow wash basin with two integrated handrails in the front for assistance. The wash basin has a flat bottom, leaving room for the user's legs underneath. It is ideal for bathrooms where the available space has to be efficiently utilised. Withstands up to 200kg.

Product	Colour	Code Number
1 tap-hole basin with overflow	White	P6835223
1 tap-hole basin without overflow	White	P6835224

Matrix - Large Vanity

Wash basin with integrated handrails

'MATRIX Large' is a vanity wash basin designed for bathrooms with plenty of space. The wash basin has two integrated handrails on the front edge and two handrails at the sides. Withstands up to 200kg.

Product	Colour	Code Number
1 tap-hole vanity basin with overflow	White	P6835225
1 tap-hole vanity basin without overflow	White	P6835226

Matrix - Angle Vanity

Wash basin with integrated handrails

'MATRIX Angle' is designed so the wash basin can be positioned close to the toilet, while leaving a spacious work area for a helper. The basin has two integrated handrails in the front with a front drip tray to prevent water dripping onto the user. The basin's raised edges prevent water from running over the back or sides of the basin. Withstands up to 200kg.

*for support arms

CareElements - Free-Standing Support Arm

Including fixing kit for floor.

Suitable if:

- Wall is unstable
- Distance from wall to front of toilet exceeds 700mm
- Mounting on wall is not possible
- Height adjustment from 215mm to 885mm
- Max vertical load 120kg

Product	Code Number
670mm Adjustable Free-Standing Support Arm	P6835161

CareElements - Folding Shower Seat

For some users, being able to sit while showering is a matter of safety. The shower seats are designed for mounting in the shower area and can be easily folded up or down according to need.

Max vertical load 125kg
Projection when folded: 197mm.

Product	Code Number
Folding Shower Seat	P6823822

CareElements - Folding Shower Seat with Support Leg

The addition of an adjustable support leg provides extra stability and strength if required.

Max vertical load 125kg
Projection when folded: 250mm.

Product	Code Number
Folding Shower Seat with Support Leg	P6835452

CareElements - Backrest for Folding Shower Seat

Providing a backrest in conjunction with the shower seat will allow for a more comfortable showering experience.

Product	Code Number
Backrest for Folding Shower Seat	P6823824

CareElements - 1000 Series Nursing Bench - Adjustable Height

The 1000 Series Nursing Bench enables carers to effectively and safely care for their patient or loved one. Carers can easily adjust the height of the bench in order to avoid back strain. Integrated gas cylinders enable the bench to fold back into the wall.

Meeting recommendations detailed in the British Standard BS8300:2009, the range of height adjustable, adult-sized changing benches are particularly suitable for Changing Places facilities.

A range of showering and nursing benches with PVC coated canvas stretchers, suitable for Changing Places facilities, school hygiene rooms and home adaptations. Maximum weight limit 150 kg. When mounted at the recommended height, the height of the nursing bench can be adjusted from 500 to 900mm above floor. Including remote control.

Product	Code Number
Electric Nursing Bench, 1400mm	P6825225
Electric Nursing Bench, 1800mm	P6825230

CareElements - Splash Curtain for Nursing Bench

Protects the carer against splashing.

Splash Curtain 1400mm	P6825235
Splash Curtain 1800mm	P6825240

CareElements - Safety Rail

Provides safety for the user.

Product	Code Number
Safety Rail 1400-1800mm	P6825245

CareElements - 2000 Series Nursing Bench - Adjustable Height

1800 mm powered nursing bench with wired hand control, 700 mm height adjustable.

Including safety rail and water collection tray with integrated outlet. Materials: Coated steel, mesh cover, polystyrene.

The frame is made from powder-laquered stainless steel, the lying surface is a mesh cover. The water collection tray is made from polystyrene.

Can be adjusted from 300 - 1000mm above floor

Max load 175kg

Includes safety rail

Water collection tray with integrated outlet.

Product	Code Number
Electric Nursing Bench, 1800mm	P6825315

CareElements - 3000 Series Nursing Bench - Adjustable Height

In situations where a person needs to be bathed while lying down, it is important that the nursing bench can be lowered to a suitable height for transfer, for example from a wheelchair, and then raised to a suitable working height for the carer. It is equally important to ensure that the bench is sufficiently comfortable and safe.

The electrically powered nursing bench can be adjusted by 700mm, from 300-1000mm above floor. The water collection tray is equipped with an integrated water outlet that prevents water from splashing on carers or the floor. The integrated gas cylinder enables the bench to be folded easily against the wall when not in use to maximise floor space.

Maximum weight limit 200 kg.

The flexible hose attached to the centre outlet of the water collection tray can be connected to either an outlet in the floor or on the wall.

Manually adjustable back support at either end and safety rail.

Product	Code Number
1800mm, 700mm Height adj., Electric Motor	P6825221

Hewi

Bathroom Solutions

Accessible solutions from Hewi have been developed to universal design criteria and therefore enable intergenerational use. The central design component for the Hewi System 815 range of accessories is the fixing element, which is based on the basic shape of the circle. The round style element is combined with linear tubular design.

The Hewi System 815 includes classic sanitary accessories, comfort and convenience elements through to accessibility products. In this way, architects, planners and designers, building contractors and users are offered suitable solutions, which can be matched to the individual needs of the users and are independent of the areas of use.

Warm Touch

Products with warm to touch properties unite the visual properties of high gloss chrome surfaces with the haptic properties of polyamide. The products feel pleasantly warm and therefore contribute to the user's feeling of well being. Due to this property, warm touch products are especially suitable for patients with increased sensitivity to cold, for example, those who have rheumatic disorders.

Ropox

Bathroom Solutions

We offer a range of functional assistive technology products manufactured by Ropox, that are beautiful and simple in design. Ropox showering solutions have been designed to co-ordinate harmoniously with interiors of the dwelling, whilst also improving the working environment.

The performance of certain activities is essential for users to live a dignified life. These activities can be taken for granted in everyday life. We have therefore specialised in flexible and integrated solutions for facilitating daily living in private homes, institutions or care centres.

Ropox Shower Seat Wall Mounted

Its Polyurethane cover is both comfortable and supportive. This material is durable and insulated, so that the seat does not feel cold or hard. The main seat profile has an aluminium stainless steel frame for strength and rigidity.

Technical Details:

- Overall width 469mm
- Overall depth 552mm
- Seat width 469mm
- Seat depth 500mm
- Max weight 150kg (23st)

Product	Colour	Code Number

MPacks

Accessible unisex toilet equipment

Wheelchair users should be able to approach, transfer to, and use the sanitary facilities provided within a building. This requires the provision of a wheelchair accessible unisex toilet and should be compliant with the British Standard, BS 8300 February 2009 + A1: 2010 edition, that focuses on the 'design of buildings and their approaches to meet the needs of disabled people'. N&C Phlexicare Doc MPacks are designed with complete safety and comfort in mind.

The space provided for manoeuvring, should enable wheelchair users to adopt various transfer techniques that allow independent or assisted use.

Front transfer, using grab rails to move from wheelchair to W.C.

Oblique transfer, using grab rails and/or grasping W.C.

Lateral transfer, using grab rails and/or grasping W.C. with one wheel backed up to rear wall and the wheelchair at an angle to W.C

Lateral transfer, using grab rails and/or grasping W.C with both wheels backed up to rear wall and the wheelchair roughly parallel to W.C.

Light reflective values

Visual impairment in users can mean reliance on the use of spatial perception and orientation, such as the skirting-floor and skirting-wall junction for assistance. The contrast in the colours, lighting and surface finish of a room and the components within it play a major role in creating a fully accessible environment. Guidance found in The Building Regulations Approved Document Part M, advises architects and designers working on new build projects or major refurbishment to contrast visually adjacent critical surfaces by selecting colours with a difference in light reflectance value (LRV) of more than 30 points. A test method for measuring the LRV of flat surfaces with opaque materials, including those coated with non-opaque coatings, or coverings and multi-coloured surfaces, is described in BS 8493.

Consideration should also be made for the positioning of equipment for both wheelchair and ambulant users. The BS8300 is very prescriptive in these measurements and requirements. N&C Phlexicare provides these dimensions in technical drawings contained within each MPack box supplied.

Shelving

One large and one small acrylic capped ABS shelves with drainage slots and stainless steel supports.

Lever

The large spatulate lever is ideal for wheelchair users and can be situated on the correct open side of our cistern.

Backrest

With this low level system W.C. N&C Phlexicare supplies a colour contrasted padded backrest.

Drop Down Rail

A sturdy colour co-ordinated drop down rail.

Toilet Seat

A quality toilet seat with high colour contrast, unique stabilising buffers, plus stainless steel hinges for added strength.

Raised Height Pan

At 480mm to the top of the seat, this large footprint pan offers the ultimate in stability.

Colour Contrast

Colour contrast is an important design consideration of your Document M Accessible Toilet, ensuring that the grab rails and seat are highly visible to users with visual impairments.

Cistern complete with screw down lid for extra safety and security.

Audio/Visual Alarm with Visible Reset Button

The Phlexicare emergency alarm has a red pull cord plus the required two red 50mm bangles. (BS8300 February 2009).

Two clothes hooks, one should be positioned at 1050mm and the other positioned at 1400mm above the floor.
Stainless steel mirror 1000mm x 400mm.
The above items are fitted on the opposite wall to the basin.

Accessories

This package consists of automatic hand dryer, soap, paper towel and toilet tissue dispensers. All are easy to use and durable.

Grab Rails

An ergonomic design with a slip-resistant grip, non-conductive, deep blue for colour contrast & concealed fixings. The 5th grab rail is fitted to the inside of the toilet door.

Thermostatic Mixer Tap

This TMV3 Thermostatic basin mixer tap is an integrated solution that will prevent hand scalding.

Basin

The gently rounded basin with a fully glazed underside, is ideal for wheelchair users and handed tapholes enable the correct positioning of the tap nearest to the W.C. pan.

Extra Basin Bracket

An extra basin bracket is supplied with the Classic MPack for added support.

Reach Ranges

Extensive research has been carried out on reaching activities for wheelchair users and ambulant disabled in everyday activities. This has particular relevance for Document M toileting and the positioning of all equipment and accessories, for example the relationship of the W.C. to the finger rinse basin and other accessories should allow a person to wash and dry hands while seated on the W.C. If these measurements have not been adhered to, it may render the installation non compliant.

There are two reach ranges, which are intended to relate to the physical demands of an activity or action in terms of its precision or how often it is normally carried out.

A) Comfortable reach range - Determined by the capability of a person to reach in a comfortable and relaxed manner without stretching or bending from the waist and is appropriate for an activity that requires precision in its execution and is frequently performed.

B) Extended reach range - Determined by the capability of a person to reach when stretching and/or bending the body and is appropriate for an activity that does not require precision and is infrequently performed.

- 1 Reach angles
- 2 Vertical reference plane (from front of seat)
- 3 Horizontal reference plane
- 4 Vertical reference plane (from toes)
- 5 Front access
- 6 Vertical reference plane (from wheel)
- 7 Side access

Person	Access	Reach Angle	Height (H) mm		Depth (D) mm	
			Comfortable	Extended	Comfortable	Extended
Wheelchair	Front	+70°	1000	1150	90	120
		horizontal	(750)	(750)	180	230
		-24°	650	650	120	200
	Side	+70°	1060	1170	100	135
		horizontal	(750)	(750)	220	310
		-24°	665	630	165	230
Ambulant disabled	Front	+70°	1500	1625	200	250
		horizontal	(850)	(850)	280	450
		-24°	750	700	180	310

The table shows the dimensions, which are for reach at right angles to the vertical reference plane, are for height and the associated depth from the horizontal reference plane. The dimensions shown in the table represent the reach capabilities of 90% of the sample of wheelchair users and ambulant disabled people who took part in the trials.

N&C Phlexicare MPack

These drawings are fully compliant with BS8300. They show the dimensions as well as the location of sanitaryware and other fittings, for the standard unisex accessible corner W.C.

Failure to adhere to the BS8300 February 2009 +A1: 2010 standard will result in the installation being non compliant. Eg: Use of a centre taphole basin would render installation instantly non-compliant.

Wheelchair turning space 1500 x 1500mm

Specialist Products

N&C Phlexicare realise how time consuming it would be for a specifier to source all of the products to meet the requirements. Indeed, some of the products did not even exist until we decided to manufacture them specifically to meet the necessary criteria. With a several million pound stockholding and depots throughout the UK, we aim to provide the majority of products ex-stock for immediate delivery.

N&C Pentland Pan

Designed specifically to meet the height requirements of BS8300 and Approved Document 'M' this exclusive pan has the additional feature of a large footprint. This is beneficial in providing added stability and when used as a replacement to an existing pan, the large footprint could mean that the existing flooring may not need to be replaced.

NB not applicable to the Economy MPack.

N&C Pentland Low Level Cistern

All of our low level MPacks are supplied with a handed cistern, which enables the spatulate flushing lever to be situated on the correct (transfer) side of the pan. For additional safety the cistern is supplied with a screw down lid.

N&C Pentland Close Coupled Cistern

In addition to handing features discussed above our Close Coupled MPacks have a screw down lid which offers additional support and meets the requirements of BS8300.

Audio Visual Alarm

Specifically designed to fully comply, visual and audible feedback should be provided to indicate that, when the alarm has been operated, the emergency assistance call has been acknowledged and is being actioned. An emergency assistance pull cord (coloured red) should be provided with two red bangles of 50mm diameter, one set at a height of between 800mm and 1000mm and the other set at 100mm above the floor level. This pull cord should never be tied up out of reach.

The Advanced Toilet Seat

Great stress is applied to the toilet seat when transferring laterally from a wheelchair, therefore it is essential to provide a strong seat capable of withstanding this treatment. Our seat has strong stainless steel hinges, lugs, which grip the inside of the pan to give added strength and has built in anti-microbial protection. Where a seat with a cover is chosen, this lid also offers useful lumbar support, when combined with a close coupled suite. This would not impede transfer as the lid sits further back than the leading edge of the flushing lever.

N&C Pentland Handrinse Basin

It is very important to use a wash basin capable of positioning the tap nearest to the W.C., so that it can be easily reached by someone seated on the W.C.

According to the research leading to the publication of BS8300, the advantage of side mounting is that it is easier to wash out urine bottles (a procedure which would be impossible with a centralised tap).

Shelves

Another pair of products that had to be specially manufactured to meet the requirements are the two shelves, one generally used for colostomy bags. We realized that most shelves fabricated on site would soon become a health hazard. Ours have drainage slots for cleaning in situ, but can be removed or replaced when necessary and are mounted onto stainless steel supports.

Thermostatic Mixer Tap

A completely integrated solution to prevent hand scalding, this sequential Thermostatic Basin Mixer Tap (TMV3) is suitable for use with wash basins in all public areas. There is no need for a separate Thermostatic Mixing Valve as temperature is regulated internally.

Spray Mixer Tap

Our sequential spray mixer tap is ideal for a handrinse basin and is considered an enhancement to the up, down, left and right minimum requirement. When combined with our TMV3 thermostatic mixer valve, one half turn of the lever will result in a temperature no higher than the required 41°.

MPack Box

All of our MPacks are supplied in a sturdy box for your convenience. We also supply the dimensional fixing drawing to ensure the equipment is positioned correctly to conform with the British Standard.

Classic Blue MPack

Low Level Cistern

Our fully compliant, Classic Blue Low Level Doc MPack has been ergonomically designed with safety and comfort of users in mind. Our most comprehensive Mpack comes complete with TMV3 approved thermostatic mixer and co-ordinated accessories, whilst also offering visual contrast for visually impaired users for safe and easy manoeuvring. The Classic Blue Low Level Pack offers a wide range of transfer possibilities to suit individual requirements, to ensure full compliance with both the Building Regulations Approved Document M 2015 Edition and BS 8300 2009 +A1 :2010.

Features and Benefits:

- Fully BS800 compliant (updated February 2009)
- Complete co-ordination between accessories
- Handed basin
- Elegant raised height pan
- Luxury padded backrest
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box
- Fully compliant audio/visual alarm (Feb 2009)
- TMV3 thermostatic basin mixer incorporating environmental water saving spray action
- ABS grab rails ensures no rotting, rust or corrosion

Cistern lever should be installed on the right of the cistern for LH installation and on the left for a RH installation. (Left hand illustrated.)

There must be visual contrast between the wall and floor finishes. The wall finish must also contrast with the sanitaryware and grab rails. Lever action tap supplied.

The basin must be handed left and right to enable the tap to be fitted nearest to the W.C. Failure to achieve this will render the installation non-compliant.

Doors should be fitted with light action privacy bolts with emergency release mechanisms or N&C Phlexicare Radar locks supplied by N&C under the Radar National key scheme.

All doors, alarms, Equality Act compliant handles & associated Ironmongery can all be obtained from N&C. An emergency assistance alarm must have:

1. Visual and audible indicators confirming the emergency call has been received.

2. A reset control reachable from the W.C. pan or a wheelchair - shower seat.

3. A signal that is distinguishable visually and audibly from the fire alarm.

4. A red alarm cord with two rings, one set between 800mm to 1000mm and the other 100mm above the floor surface.

The W.C. pan can be installed as a standard low level configuration with exposed cistern. To achieve this install the W.C. 200mm off the wall. If required the void left could be filled by our laminate spacer box unit see page 170

Plus Pack MPack

Low Level Cistern

Our Plus Pack MPack comes complete with TMV3 approved thermostatic mixer and extra strong W.C. seat including anti-bacterial protection. This pack is supplied without accessories making it ideal for those occasions where the ancillary items are to be supplied by a third party or leasing company. Wheelchair users should be able to approach, transfer to and use the sanitary facilities provided within a building. This requires the provision of a wheelchair accessible unisex toilet.

Features and Benefits:

- BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Complete co-ordination between accessories
- Handed wash basin
- Elegant raised height pan
- Luxury padded backrest
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr

Plus Pack MPack

Close Coupled

A complete special needs washroom solution, with TMV3 approved thermostatic mixer and extra strong W.C. seat which includes anti-bacterial protection. Also comprising a close coupled W.C. with the required screw down cistern cover. This pack is supplied without accessories making it ideal for those occasions where the ancillary items are to be supplied by a third party or leasing company.

Features and Benefits:

- BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Complete co-ordination between accessories
- Handed wash basin
- Attractive close coupled design
- Elegant raised height pan
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box
- TMV3 thermostatic basin mixer incorporating environmental water saving spray action
- ABS grab rails ensures no rotting, rust or corrosion

Cistern lever should be installed on the right of the cistern for LH installation and on the left for a RH installation. (Left hand illustrated.)
 There must be visual contrast between the wall and floor finishes.
 The wall finish must also contrast with the sanitary ware and grab rails.
 Lever action tap supplied.
 The basin must be handed left and right to enable the tap to be fitted nearest to the W.C. Failure to achieve this will render the installation non-compliant.
 Doors should be fitted with light action privacy bolts with emergency release mechanisms or N&C Phlexicare Radar locks supplied by N&C under the Radar National key scheme.

All doors, alarms, Equality Act compliant handles & associated Ironmongery can all be obtained from N&C.
 An emergency assistance alarm must have:
 1. Visual and audible indicators confirming the emergency call has been received.
 2. A reset control reachable from the W.C. pan or a wheelchair - shower seat.
 3. A signal that is distinguishable visually and audibly from the fire alarm.
 4. A red alarm cord with two rings, one set between 800mm and 1000mm and the other 100mm above the floor surface.

Economy MPack

Low Level Cistern

Where compliance is paramount, but cost is prohibitive when refurbishing existing installations, we have produced the N&C Phlexicare Economy MPack, along with the necessary accessories to meet the requirements.

Please note, however, that to provide adequate visual contrast, some thought will need to be given to the colours of wall and floor finishes.

Features and Benefits:

- Easy installation
- Co-ordinating grab rails and sanitaryware
- Fully compliant Document M Pack (when all extras are fitted)
- Budget Document M solution with no compromise on quality or compliance
- Handed wash basin
- Stainless steel hinge on seat
- Drop down rail locks in upright position

The W.C. pan can be installed as a standard low level configuration with exposed cistern. To achieve this install the W.C. 200mm off the wall.

Cistern lever should be installed on the right of the cistern for LH installation and on the left for a RH installation. (Left hand illustrated.)
 There must be visual contrast between the wall and floor finishes.
 The wall finish must also contrast with the sanitaryware and grab rails.
 Lever action tap supplied.
 The basin must be handed left and right to enable the tap to be fitted nearest to the W.C. Failure to achieve this will render the installation non-compliant.
 Doors should be fitted with light action privacy bolts with emergency release mechanisms or N&C Phlexicare Radar locks supplied by N&C under the Radar National key scheme.

All doors, alarms, Equality Act compliant handles & associated Ironmongery can all be obtained from N&C.
 An emergency assistance alarm must have:
 1. Visual and audible indicators confirming the emergency call has been received.
 2. A reset control reachable from the W.C. pan or a wheelchair - shower seat.
 3. A signal that is distinguishable visually and audibly from the fire alarm.
 4. A red alarm cord with two rings, one set between 800mm and 1000mm and the other 100mm above the floor surface.

White Economy Low Level		P6830063	
1	BSS Low Level Raised Height Pan	3	Concealed Basin Hangers - Pair
1	White Seat, no Cover	3	Chrome Spray Mixer Tap - Lever Operation
2	Pentland Reversible Cistern	3	Chrome 32mm Grated Waste
2	6 litre Cistern Fitting Pack	4	White Single Folding Rail 750mm
2	Chrome Spatulate Flush lever	5	White Backrest Rail 400 x 250mm
2	White Flushbend 760 x 305mm	6	White ABS 600 x 35mm Grab Rails x 5
3	Pentland Hand Basin 395 x 340 mm		
3	White Plastic Taphole Stopper

For accessories see page 255.

Corporate MPack

Close Coupled Cistern

Whilst incorporating all the features of a fully compliant Document M pack, our Corporate MPack, is ideal for a more stylish aesthetic. Incorporates white and chrome finishes, perfect for accessible toilet facilities within an office, hotel, club or restaurant where a more luxurious aesthetic is required.

Features and Benefits:

- Ultimate MPack
- BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Complete co-ordination between accessories
- Handed wash basin
- Attractive close coupled design
- Elegant raised height pan
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box
- Fully compliant audio/visual alarm (Feb 2009)
- TMV3 thermostatic basin mixer incorporating environmental water saving spray action
- Chrome plated grab rails

Cistern lever should be installed on the right of the cistern for LH installation and on the left for a RH installation. (Left hand illustrated.)

There must be visual contrast between the wall and floor finishes. The wall finish must also contrast with the sanitaryware and grab rails. Lever action tap supplied.

The basin must be handed left and right to enable the tap to be fitted nearest to the W.C. Failure to achieve this will render the installation non-compliant.

Doors should be fitted with light action privacy bolts with emergency release mechanisms or N&C Phlexicare Radar locks supplied by N&C under the RadarNational key scheme.

All doors, alarms, Equality Act compliant handles & associated Ironmongery can all be obtained from N&C.

An emergency assistance alarm must have:

1. Visual and audible indicators confirming the emergency call has been received.

2. A reset control reachable from the W.C. pan or a wheelchair - shower seat.

3. A signal that is distinguishable visually and audibly from the fire alarm.

4. A red alarm cord with two rings, one set between 800mm and 1000mm and the other 100mm above the floor surface.

Peninsular MPack

Low Level Cistern

Our N&C Phlexicare, Peninsular MPack layout allows for wheelchair users to transfer from either side of the W.C. pan and with ample space for one or more assistants should it be required. An ideal option for hospitals, care homes, nursing homes, transport terminals and day centres, particularly when skilled assistance is available.

Features and Benefits:

- BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Complete co-ordination between accessories
- Large wash hand basin
- Elegant raised height pan
- Luxury padded backrest
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box
- Fully compliant audio/visual alarm (Feb 2009)
- Extra pull cord and ring
- TMV3 thermostatic basin mixer incorporating environmental water saving spray action
- Drop down rails with sprung toilet roll holders for left and right handed use

There must be visual contrast between the wall and floor finishes.
 The wall finish must also contrast with the sanitaryware and grab rails.
 Lever action tap supplied.
 Large wash basin with vertical grab rails either side.
 Doors should be fitted with light action privacy bolts with emergency release mechanisms or N&C Phlexicare Radar locks supplied by N&C under the Radar National key scheme.

All doors, alarms, Equality Act compliant handles & associated Ironmongery can all be obtained from N&C.

An emergency assistance alarm must have:

1. Visual and audible indicators confirming the emergency call has been received.
2. A reset control reachable from the W.C. pan or a wheelchair - shower seat.
3. A signal that is distinguishable visually and audibly from the fire alarm.
4. A red alarm cord with two rings, one set between 800mm and 1000mm and the other 100mm above the floor surface.

Ambulant MPack

Close Coupled

Our Ambulant MPack is ideal for use in separate sex toilets washrooms. The perfect solution for ambulant disabled users or users requiring assistance. The cubicle should be fitted with support rails and include a minimum activity space to accommodate people who use crutches or otherwise have impaired leg movement.

Features and Benefits:

- BS8300 compliant (updated February 2009)
- Attractive close coupled design
- Elegant raised height pan
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box

A) Elevation

The minimum clear overall dimensions of a W.C. cubicle accessible by ambulant disabled people, as well as the location of sanitary and other fittings, should be as shown in this set of drawings.

Where the cubicle has an inward opening door, it should be fitted with a double action pivot set and an emergency release mechanism operated from the outside. Inward opening cubicle doors should be used only in existing buildings where there is no alternative.

Note: The overall dimensions shown exclude such items as heat emitters and boxing in of pipe work and adjustments in room size will be needed to accommodate these items.

B) Plan (New Building)

Outward opening door with horizontal pull rail.

C) Plan (Existing Building)

Inward opening door with effective clear width of at least 800mm. Door swing clear of 450mm diameter space on plan between fittings.

Changing Room MPack

Wheelchair users or those with serious impairments often need extra facilities and sufficient space for dressing and undressing while seated or lying down. We offer self-contained unisex changing facilities for users that require assistance and/or space for carers to assist.

Features and Benefits:

- Fully BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Complete co-ordination between accessories
- Luxury padded seat
- Delivered in one box
- Fully compliant audio/visual alarm (Feb 2009)

Space might also be required for one or two assistants and/or a shower chair to transfer into before showering or entering a swimming pool.

Vertical support struts from the seat to the floor should not be installed. A padded tip up seat should be securely fixed to the wall as shown.

Drop down support rails and grab rails for a self contained changing area should be located as shown.

Drop down support rails at right angles to each other can help prevent a disabled person falling forward or sideways.

Changing Places MPack

A changing places (CP) facility is a combined toilet, shower and changing room for use by people with complex and multiple disabilities who require the help of two assistants. The space needs to be fitted with a fixed track hoist system. The Changing Places facility should be in addition to, not instead of, the provision of unisex accessible W.C.'s.

Features and Benefits:

- Fully BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Complete co-ordination between accessories
- Large power assisted wash hand basin
- Retractable privacy curtain
- Height adjustable shower/changing bench
- Elegant raised height pan
- Luxury padded backrest
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box
- Fully compliant audio/visual alarm (Feb 2009)
- TMV3 thermostatic basin mixer incorporating environmental water saving spray action
- Drop down rails with one sprung toilet roll holder

See our Peninsular MPack, page 268 - 269, for layout dimensions of W.C. suite and grab rails within this Changing Places accessible toilet facility.

Additional Requirements

- Large sanitary disposal bin*
- Wide paper roll dispenser*
- Sanitary towel dispenser*
- *Obtainable from washroom suppliers

- Radar lock set R/H
- Radar lock set L/H
- For full details see page 282 - 287.

W.C. & Shower MPack

Self Contained Washroom

Our self contained W.C and Shower MPack incorporates our contrasting components with a larger washbasin, whilst incorporating an accessible shower facility with seat, shower and support rails within the same washroom area. Particularly suitable for hotels, holiday homes, hostels, university and college halls of residence.

Features and Benefits:

- Fully BS8300 compliant (updated February 2009)
- Highest quality materials used throughout
- Large hand wash basin
- Elegant raised height pan
- Luxury padded backrest
- Ergonomic designed toilet seat
- Easy operation dual flush lever 6/4ltr
- Screw down lid on cistern
- Delivered in one box
- Fully compliant audio/visual alarm (Feb 2009)
- TMV3 Thermostatic basin mixer incorporating environmental water saving spray action
- Luxury padded shower seat
- Additional alarm cord with rings
- Concealed or exposed shower valve kit
- TMV3 thermostatic mixer shower
- Tubular chrome shower rail and fixings

The shower room must have a 2100mm minimum unrestricted height.

The floor of the shower area and shower room must be slip resistant and self draining.

A shelf reachable from the shower seat or wheelchair before or after transfer must be provided for toiletries.

A shower fixing should be controlled by a lever operated thermostatic mixer that delivers water at a temperature not exceeding 43 degrees. The markings on the shower control should be logical and clear to blind and partially sighted people.

The temperature of the water circulating in the pipework needs to be at least 60 degrees to avoid the risks of legionella.

The basin in the bathroom is large enough for hair or full body washing, it can be used for hand rinsing. It is likely that users will fill the basin with water before sitting on the W.C. pan, as the tap may be out of reach.

For the complete W.C. portion of this package please specify P6830070

For the complete showering portion of this package please specify P6830065

RADAR Key Scheme

RADAR Blue Heart Key

Disability Right UK (formerly R.A.D.A.R.) promotes a U.K. national scheme, whereby specially manufactured locks are fitted in toilets UK wide, that can only be operated using a RADAR key. The National Key Scheme (NKS) offers disabled people independent access to locked public toilets around the country. Toilets fitted with N&C Phlexicare RADAR National Key Scheme (NKS) locks can now be found in shopping centres, pubs, cafés, department stores, bus and train stations and many other locations in most parts of the country.

Official RADAR NKS manufacturers

As part of the official and original National Key Scheme, our new 5th generation RADAR lock has been designed to be retro-fitted to replace existing N&C Phlexicare RADAR locksets, if required. We strongly recommend fixing the vinyl surround (supplied) as this creates a contrast against the lock, allowing the lock to be easily visible for users who are partially sighted.

Original N&C Phlexicare RADAR Lockset
Part of the National Key Scheme 1975

RADAR Key Scheme

The National Key Scheme (NKS) offers disabled people independent access to locked public toilets around the country. Toilets fitted with N&C Phlexicare RADAR National Key Scheme (NKS) locks can now be found in shopping centres, pubs, cafés, department stores, bus and train stations and many other locations in most parts of the country. Our locks have been tested to meet requirements set out in BS8300.

- The original design RADAR lockset, used and trusted for decades throughout the UK
- The 6 lever lock is operated from the outside by use of the RADAR key.
- New 5th generation lockset can be retrofit to existing
- Attractive, modern rounded edge design
- Return to door safety lever handle
- External indicator
- External emergency coin release
- Reversible latch bolt
- Bolt through fixing

RADAR Lockset

The latch bolt can be easily reversed for inward or outward opening doors. To determine which hand is required, standing inside the toilet, if the hinges are on the right of the door, you will need a right hand lockset. If the hinges are on the left, you will need a left hand lockset.

Supplied complete with a colour contrast vinyl surround to give increase light reflective values against the lever handle back plate and the door surface to aid users with visual impairments.

Lift to lock and depress to exit lever handle operations exceeds the EN1906:2012 maximum requirement of 200,000 cycles (grade 7: high frequency of use: 200 000 cycles). Included in Neutral Salt Spray test to 240 hours (EN1670: 2007 Grade 4 very high corrosion resistance)

RADAR Lockset

Lever handle should be fitted between 800mm-1050mm above the floor (1000mm preferred).

Radar Lockset

- The original design RADAR lockset, trusted for decades throughout the UK
- The 6 lever lock is operated by use of the RADAR key (outside).
- Privacy and safety is maintained at all times by the external red/white indicator
- Coin release in case of emergency

Radar Handleset

- Return to door extended cranked handle for improved ease of use and to satisfy the requirements of the Equality Act and BS8300
- External privacy indicator and emergency coin release
- Provided with bolt through fixings for secure fixing over time
- Achieves Category of Use Grade 2 EN1906

Radar Lock

- Latch head has been tested to 1,000,000 bolt slam operations
- Lock follower for the lever handle has been tested to 1,000,000 cycles
- Included in Neutral Salt Spray test to 480hrs (EN1670: 2007 Grade 5 exceptionally high corrosion resistance)

RADAR Lockset

A complete lockset comprising a 6 lever Mortice lock and engraved furniture, which can be supplied in polished silver, polished aluminium (P.A.A.) and polished gold aluminium (P.G.), incorporating an external indicator and emergency coin release. All locksets are supplied with one bow shaped handle key and fixings.

Product	Code Number
Lockset Polished Aluminium Right Hand	H0148502
Lockset Polished Aluminium Left Hand	H0148503

RADAR Automatic Disabled Toilet Entry System

The Phlexicare automatic door openers provide safe and easy access for all ambulant and wheelchair traffic. The system operates at the turn of an N&C Phlexicare RADAR key in a wall mounted control panel.

Wheelchair accessible toilets are normally designed with an outward opening door, whereby to open the door, a wheelchair user has to pull the door towards them whilst at the same time propelling themselves backwards.

The N&C Phlexicare RADAR automatic disabled toilet entry system can be installed on single leaf hinged and sliding doors up to 1200mm wide and 250kg in weight. All electrical work to current standard including testing and certification registered with building control as required by BS6761. Quotations for this work are subject to site survey.

- Automatic entry using a RADAR key and sensor operation
- Safe and easy to use, as user isn't required to handle the door
- Sensor operated locking system that disconnects external control panel
- Illuminated indicator to inform whether W.C. is vacant/occupied
- Fitted with safety mechanism, allowing door reversal should it encounter an obstacle
- Wipe down plate surfaces for hygiene
- 250mm x 190mm satin stainless steel outside plate
- 140mm x 140mm satin stainless steel inside plate
- 'fireman's drop switch' is provided.

Product	Code Number
RADAR Unit	H2902600
RADAR External Magnetic Kit	H2902620
RADAR Internal Magnetic Kit	H2902640

Should be fixed adjacent to portable ramp and locking station to alert users that the ramp can be accessed with their RADAR key.

We Love..

RADAR

Manufactured and tested to high quality standards, each component of the lock has been designed with the user in mind. Please be aware, there are many copies of the lock on the market that are not official National Key Scheme RADAR locks and are therefore not guaranteed to work with RADAR key users. N&C Phlexicare are the only official lockset guaranteed to work with the official RADAR key.

N&C RADAR Blue Heart Comfort Key

RADAR Keys are available to disabled or registered blind people to enable them to access facilities safely, comfortably and without the need to queue for public W.C's. This aims to give protection against vandalism or misuse, so that a clean functional toilet is available when required.

- From the manufacturers of the official RADAR NKS lock
- Designed for Comfort
- 'Not cold to touch'
- Ergonomically designed heart shaped fob for arthritic hands
- Universal key opens all locks that form part of the RADAR National Key Scheme
- Attractive nylon blue heart fob, and stainless steel design

Product	Code Number
N&C RADAR Blue Heart Comfort Key	H0149051

N&C RADAR Stainless Steel Key

- From the manufacturers of the official RADAR NKS lock
- Universal key opens all locks that form part of the RADAR National Key Scheme

Product	Code Number
N&C RADAR Stainless Steel Key	H0149001

RADAR Lockset Vinyl Surround - Replacement

The RADAR Cover Plate fits around the furniture, providing a colour contrast to aid those with visual impairments and can also be used when replacing an old style lock to cover the bolt holes. 7 vibrant colours to choose from.

This reversible plate can be used with information text or as a plain contrast

Product	Code Number
Blue Cover Plate	H0149020

RADAR Padlock, Hasp and Staple

The padlock is of “ traditional old English” design colour coated red to indicate that it can be accessed from both sides of the padlock with a RADAR key.

- Galvanised steel body, colour coated finish, weather resistant
- Lever mechanism
- All brass internal parts

Used in conjunction with the RADAR hasp and staple also colour coated red, it confirms to the user that the padlock can be accessed with a RADAR key from afar. The fixing screws of the hasp and staple are concealed when in the ‘closed’ position to provide additional security.

* Key Supplied Separately

Controls and Access

Buildings, by their nature, have to be accessed by both ambulant pedestrian traffic and wheelchair users alike. For obvious reasons of security, privacy and climate control, buildings require doors and windows to the external and internal areas. N&C Phlexicare offer a range of products providing an access solution to a variety of window, door and ramp situations.

Electric Window Control System

Electric window openers can be activated manually, either by a wall switch or a handheld remote control.

For windows over 1000mm width it is recommended that two openers are used (together with Tandem Control) to achieve effective closure of the windows.

Electric System	Code Number
ACK4 Standard Opener 24v DC	H3405014
ACK4 Standard Opener 230v AC	H3405015

Cable Window Restrictors

Jackloc Window Restrictors, Key Locking, Tested to BS EN 14351:2006 and BS EN 1670:2007, Cable length allows opening up to 200mm (recommended by Health & Safety is Max 100mm)

Electric System	Code Number
White	H0122503
Brass	H0122504
Chrome	H0122505

Manual Window Control System

These can be used on most styles of windows to operate individual or multiple sets from a single wall mounted operator connected by conduit with inner cable to the opener on the window.

When the handle is turned the inner cable is driven forward or backwards, thus opening or closing the window.

Depending on height limitations windows can be opened 250mm or 380mm.

This system is extremely flexible as the conduit can be bent around obstacles to achieve your required design.

Design Rules

One chain opener per window up to 1000mm wide - over this size two openers are required.

The sum of openers and bends must not exceed six.

The length of conduit and cable must not exceed 18 metres. Above this it is necessary to provide additional control units. Five Saddle Brackets are recommended for each metre of conduit.

Features and Benefits:

- Suitable for use on casement, side, top and bottom hung windows
- Suitable for timber, UPVC, aluminium windows by using the correct brackets
- Manual or powered controls should be installed between 800mm – 1000mm above floor level with a maximum reach of 400mm at 90° to window or 360mm at 60° to window

Automatic Door Operator

Our N&C Phlexicare automatic door operators provide safe and easy access for all ambulant and wheelchair traffic. The range includes operators suitable for single leaf hinged and sliding doors in both domestic and commercial environments.

A complete range of operating devices, key fobs, push pads and infra-red sensors are available to ensure each installation is customised to the needs of the user. Existing external doors, including UPVC doors with multipoint locks, can also be automated to include security features in addition to ease of operating.

The automatic door operators are fitted with software that incorporates safety sensitivity (anti-crush device) reversing the door should it encounter an obstacle and ensuring user safety. A battery back-up feature ensures operation in the event of a power failure. Work to current standards including testing and certification registered with building control as required by BS6761. This system includes installation by our engineers. Quotations for work are subject to site survey.

Euro Profile W.C. Cylinder and Turn	H0575519

Double Action Pivot Set

- Allows the the door to swing in either direction
- Door plates radiused for easier preparation
- Minimum door thickness 44mm
- Grade 304 Stainless Steel
- Bottom bracket is frame mounted
- Medium duty for internal doors
- For doors weighing up to 80kg when floor mounted and up to 110mm wide
- Top and bottom door plates have oil impregnated bronze bearings
- Set includes door bottom pivot, top centre, No 10 screws to suit
- Suitable for use on FD30 fire doors

Product	Code Number
Double Action Pivot Set	H0434081

Emergency Release Door Stop

Allows double action doors to operate as single swing when hung on pivots. Emergency access is gained by depressing the stop and pulling the door outwards.

- Grade 304 stainless steel
- Stop release resets automatically
- Rubber insert for quieter action

Product	Code Number
Emergency Release Door Stop	H0434091

Door Thresholds

The N&C door threshold strip is excellent for use on external doors to exclude draughts and avoid the ingress of rain. It is also used widely for internal doors where its low profile and chamfered edges assist wheelchair access and is DDA compliant

- Mill finish aluminium
- Black neoprene seal

Sliding Door Gear

There are occasions when a standard hinged door cannot be widened due to lack of space, or cannot be adapted to open outwards. One way to overcome this problem is to use sliding door gear. The door gear pictured here can be supplied in a variety of sizes to suit door thickness from 32 – 50mm, widths of up to 1500mm and a maximum weight of 90kg.

Product	Code Number
Door Width 900 - 1050mm Weight up to 55kg	H9994006
Door Width 1050 - 1200mm Weight up to 55kg	H9994007
Door Width 1050 - 1200mm Weight up to 90kg	H0884021

Signs and Wayfinders

The International Standards Organisation (ISO) have sought to harmonise graphic symbols throughout the EU in order to gain a greater recognition of symbols within fire and safety signs. We offer a wide portfolio of compliant signs in braille, plastic, aluminium and self adhesive vinyl materials in a range of sizes.

Signs and wayfinding are an important part of our everyday lives. Signs are intended to be easy to recognise, easy to read with good contrast against their background colour or surroundings.

Information signs give visitors and employees within a premises a clear visual guidance. Our signs are ideal for display in public buildings, parks, warehouses, schools, offices and across many other industries where the general public are able to easily interpret and recognise the intended message of a sign. We offer a wide range of braille and tactile signs

Tactile & Braille Signs & Symbols

The use of well contrasted tactile and text symbols can cater for both sighted and blind/partially sighted users. Blind and partially sighted people who do not read Braille can still identify, by tactile information.

Where Braille forms part of a sign, a marker (e.g. a notch or tactile shape) should be located at the left hand edge of the sign to help locate the Braille message.

Signs should be placed at a height suitable for everyone to reach unaided, generally this is recommended to be no lower than 1400mm from the floor and no higher than 1700mm.

Access & Ramps

Portable Ramps

Our range of portable ramps are the perfect access solution for wheelchair users, where a permanent facility is unavailable. Our portable ramps can be used in both commercial and domestic settings with a number of uses, dependent on type of access requirements.

How Steep?

Acceptable in some cases for assisted access and powered wheelchairs

A good balance between gradient and space use, suited for events etc.

Often required by social services/local authorities. Minimum required Building Regulations for installed ramps.

Sometimes required by social services/local authorities for independent access.

What Type of Ramp?

Steps/Stairs

Wood/Level Access
Door Threshold

PVC
Door Threshold

Vehicle Access

How Long?

a. Measure the step height / level difference.

b. Use the Ramp Length Guide to decide which length you need.

Step height/level difference (up to)	Length at 1:6	Length at 1:8	Length at 1:12
10cm	60cm	80cm	120cm
15cm	90cm	120cm	120cm
20cm	120cm	160cm	240cm
25cm	150cm	200cm	300cm
30cm	180cm	240cm	360cm
45cm	270cm	360cm	540cm
60cm	360cm	480cm	720cm

Aerolight - Xtra

The Aerolight-Xtra is a proven and popular ramp to access many different building types such as homes and businesses. Folds for compact storage and provides a full width anti-slip surface with excellent grip.

- Ideal for building access
- Folds for compact storage
- Contrasting colour edge strip increases visibility
- Full width anti-slip provides excellent grip
- Clips together when folded
- Made from aluminium

Aerolight - Rampkit, Up & Over

The Aerolight-Rampkit is a combination of the Aerolight-Xtra & Doorline Multi. Quick and easy to deploy and suitable for a wide variety of threshold types including UPVC and heights. Comes as a complete kit to save time and hassle.

- Folds for compact storage
- Contrasting colour edge strip increases visibility
- Full width anti-slip provides excellent grip
- Clips together when folded
- Made from aluminium

Length	Width	Weight	Capacity	Stored Dims	Code Number
120cm	76cm		300kg/47st	120x39x8cm	P6433240
150cm	76cm		300kg/47st	150x39x8cm	P6433242

210cm	76cm		300kg/47st	210x39x8cm	P6433246

Ultralight - Combi

The Ultralight-Combi ramps can be used as either a straight or up & over threshold configuration. Ideally suited to work over UPVC thresholds and perfect for use when out and about in the car. Can be used either fully extended or partially extended depending on what length is required.

- Low kerbs and long level sides increase clearance
- Compact storage
- Contrasting colour edge strip increases visibility
- Full width anti-slip provides excellent grip
- Made from aluminium

Length	Width	Weight	Capacity	Stored Dims	Code Number

Fluted

Grab Rails

An economically priced range of rails comprising a ribbed structured surface for superb grip. The 35mm fully recyclable cadmium-free pvc fluted rail section offers very good slip resistance, whilst the material helps ensure a 'not cold to the touch' feel and negates the need for earth bonding. With the addition of a concealed fixing flange, this range offers extremely good value for money.

Economy

Grab Rails

Our economy rails offer handy support in relatively dry areas. The unique offset rail allows fitting close to doors and enclosed spaces. The floor support allows grab rails to be fitted where the wall substrate is either unknown or too weak to take a grab rail. The drop down rails with legs completes the range.

Phlexiclamp

Handrail System

The Phlexiclamp handrail system has been specially designed to comply with the Equality Act and the Building Regulations Document M:2009. Unlike many brands, it is assembled very quickly and easily by hexagon key, with no riveting, drilling of tube, welding, threading or specialist tools required. Furthermore, no other special fittings are required, which enables full integration with both new systems and the refurbishment or upgrading of existing tubular structures to help meet the newer access specifications.

Features and Benefits:

- Designed to help compliance with the Equality Act 2009 and the Building Regulations Document M:2009
- Quick cost-effective assembly by hexagon key: unlike many brands, no riveting, drilling of tube, welding, threading or special tools required
- Unlike some products, no other special fittings required. Full integration with standard ranges
- Smooth flush fitting on C42 tube (42.4mm OD x 3.2mm wall thickness)
- Easy accommodation of steps and disabled access slopes
- Tubes may be powder coated in colour to help meet 'not cold to touch' and contrasting colour requirements
- Seven standard colours available
- Galvanised finish to BS EN ISO 1461. Cut tube ends to be treated with Silver Galvanising Spray (390)

In common with type 150, tubes must be 42.4mm OD x 3.2mm wall thickness e.g. 1¼" medium weight to BS EN 10255 (formerly BS 1387). All cut tube ends must be de-burred and treated with a suitable protection. Optional O-rings may be fitted to each end of the expanding Phlexiclamp fittings to achieve the best finish.

90° Bend

Manufactured from galvanised tube to form 90° corners with the minimum of parts.

Product	Code Number
90° Bend	H6700024

180° Rail Return

Manufactured from galvanised tube to allow neat return of the handrail back to the middle rail.

Product	Code Number
180° Rail Return	H6700025

Termination (Single)

Designed to reduce the risk of clothing being caught on the end of handrails when fitted. This item is supplied with a plastic stop end fitted to one end.

Product	Code Number
Termination (Single)	H6700026

90° Elbow

90° elbow to suit 1¼" medium weight tube to BS EN 10255 (formerly BS 1387). Alternatively can be used with Wall Flange below to terminate handrail to a wall.

Product	Code Number
90° Elbow	H6700027

Wall Flange

Used in conjunction with elbow above (H6700027) to terminate handrail neatly into wall. N.B. This item is not suitable for direct connection to tube or fittings other than type H6700027.

Product	Code Number
Wall Flange	H6700028

Wall Bracket

To attach the handrail to a wall at any angle.

Product	Code Number
Wall Bracket	H6700029

Internal Swivel Bracket

To attach handrail to an upright at any angle when used in conjunction with other components.

Product	Code Number
Internal Swivel Bracket	H6700030

Fitting with Male Lug

Designed to attach a free-standing handrail to an upright at any angle when used in conjunction with type 173F (not shown). Bolts & nuts are supplied separately at extra cost.

Product	Code Number
Fitting with Male Lug	H6700031

O Ring

An optional extra to be fitted to each end of the expanding fittings, to attain the best finish.

Product	Code Number
O Ring (Optional)	H6700032

Handrail Tube

Galvanised tube 42.4mm OD x 3.25 metre length.

Product	Code Number
Handrail Tube	H6700033

Internal Corner Bracket

Galvanised 900 to suit 1¼" medium weight tube

Product	Code Number
Internal Bracket	H6700053

External Corner Bracket

Galvanised 900 to suit 1¼" medium weight tube

Product	Code Number
External Bracket	H6700035

Accessories

To complete any bathroom or toileting space, the choice of accessories is important to ensure hassle free, inclusive use for all. Whether a hand dryer or soap dispenser is required, we offer a wide variety for both commercial and domestic use, to suit the application and user.

Product	Code Number
Fixed Head	S2939010

Automatic Operation Hand Dryer

- Stainless steel casing, satin finish
- Sound level 70+- 3db
- Drying time 20-25 seconds approx
- Rip proof IPX1
- Dimensions H217 x W314 x D179
- Weight 6.1kgs
- Electrics 2.2kw 230/240v

Product	Code Number
Fixed Head	S2939011

Automatic Operation Hand Dryer

- White painted casing, aluminium plated
- Sound level 70+- 5db
- Drying time 20-25 seconds approx
- Drip proof IPX1
- Dimensions H220 x W320 x D175mm
- Weight 6.1kgs
- Electrics 2.2kw 230/240v

Product	Code Number
Fixed Head	S2939003

Toilet Tissue Dispenser - Refillable

- Ideal for commercial washrooms
- Fits multiflat or bulk pack paper up to 125mm width
- Capacity – 230mm stack
- ABS cover, backplate and window
- Dimensions – H275 x W150 x D130mm
- Locking cover
- Complete with fixings

Product	Code Number
Toilet Tissue Dispenser	S2944001
Toilet Tissue (36 packs per box)	S2944011

Hand Towel Dispenser - Refillable

- Ideal for commercial washrooms
- Fits interleaved or 'C' fold hand towels up to 255mm width
- Capacity – 190mm stack
- ABS cover, backplate and window
- Dimensions – H425 x W290 x D145mm
- Locking cover
- Complete with fixings

Product	Code Number
Hand Towel Dispenser	P6834301
Interleaved Hand Towels (3500 per box)	P6834311

Soap Dispenser - Refillable

- Simple operation – push cover to dispense
- 900ml refillable reservoir
- ABS cover, backplate and window
- Dimensions – H250 x W115 x D115mm
- Locking cover
- Complete with fixings

Product	Code Number
Soap Dispenser	P6834201

Hand Towel Dispenser - Refillable

- Ideal for commercial washrooms
- Stylish modern design
- Fits interleaved or 'C' fold hand towels up to 255mm width
- Capacity – 200mm stack (2 sleeves)
- ABS backplate, PET window, lacquered stainless steel cover plate
- Dimensions – H325 x W325 x D150mm
- Locking cover
- Complete with fixings

Product	Code Number
Hand Towel Dispenser	S2942020

Ropox Maxi 2 Nursing Table

A unique, floor mounted, height adjustable nursing table with integrated sink that allow users to optimise on space, whilst considering the users' posture. The table can be lowered to 400mm to enable children to climb on. The design offers an improved working environment for hygiene and safety, due to the rounded edge design and easy clean surface. The shape of the tables allows for the baby to be positioned vertically or horizontally if the nursing bench is placed in a restricted space. The safety mechanism installed stops the bench moving should there be an obstacle during height adjustment.

- Floor mounted
- Height Adjustment 400-1000 mm
- Tested Load upto 75kg

Product	Code Number
Electric 1300 x 800mm with Basin, Tap & Kit	P7120039
Electric 900 x 800mm and Kit (no basin)	P7120040

Product	Code Number
20mm Spacer	P7120041
80mm Spacer	P7120042

Ropox Medi 2 Nursing Table

Medi 2 is a wall mounted, height adjustable nursing table with integrated sink that allow users to optimise on space, whilst considering the users' posture. The design offers an improved working environment for hygiene and safety, due to the rounded edge design and easy clean surface. The shape of the tables allows for the baby to be positioned vertically or horizontally if the nursing bench is placed in a restricted space. The safety mechanism installed stops the bench moving should there be an obstacle during height adjustment.

- Wall mounted
- Height Adjustment 650 -1000 mm
- Tested Load upto 75kg

Surestop

Whether it's a leaking appliance, a burst pipe or internal plumbing leak, there are many situations where you may need to turn off your water supply. A Surestop water switch is a quick and easy way for you to control the water supply in your home at the switch of a button.

Product	Code Number
Surestop Remote 15mm	S9902224
Surestop In-line 15mm	S9902225
Surestop Remote 22mm	S9902226
Surestop In-line 22mm	S9902227

- Easy to install - typically less than an hour
- Powered by water pressure - the unit requires no batteries or electricity
- For use on normal water supplies with pressures between 0.5 bar to 10 bar
- Surestop can be fitted to tank fed systems
- Cold water supply max 30°C at 10 bar.
- Hot water supply max 80°C at 3 bar
- Push fit connections for easy fitting.
- Available in 15mm and 22mm sizes
- Approved by WRAS (No.0803069) for connection to potable water supplies

Shower Pumps

The shower pump will enhance any of our range of gravity feed showers. Designed to boost both hot and cold water supplies you can be confident of reliable water delivery at invigorating pressure.

- Ideally matched to multi-mode handshowers
- Twin impeller design boosts both hot and cold water supplies
- Integral flowswitches ease installation
- Anti-vibration kit, includes four flexible coupling and mounting pad
- Extensive three year guarantee

Product	Code Number
1.5 Bar Shower Pump	S2250013
2.0 Bar Shower Pump	S2250021

Product	Code Number
3.0 Bar Shower Pump	S2250027

Nova-Flo

Nova-Flo is a multi-award winning product which eradicates bath floods for good. This compact device can be fitted to 99% of baths and is quick and simple to install. With Nova-Flo fitted, when the water reaches the overflow, the water supply to the taps is shut off.

- Shuts off the taps - preventing floods at source
- No electricity or batteries – fit and forget
- No running costs
- Easy to fit – push fit plumbing connections compact size
- Simple - no buttons or switches to re-set
- Green – saves water, energy and repair bills

Product	Code Number
Nova-Flo	P6349110

See the N&C Nova-Flo installation video at www.ncphlexicare.com

Slotted Basin Waste - 32mm

For fitting to vitreous china washbasins of virtually any design. Supplied with plastic drain plug or chrome plated metal drain plug, chain and stay. Slotted design for basin with overflow.

Product	Colour	Code Number
Basin Waste Plastic Plug	Chrome	S2365001
Basin Waste Chrome Plug	Chrome	S2365003

Flush Grated Waste - 32mm

Best suited to washbasins used for hand rinsing. Non-slotted. Ideal for wash basins without overflow.

Product	Colour	Code Number
Flush Grated Waste	Chrome	S2366501

Clicker Slotted Basin Waste - 32mm

This simple push down clicker waste is simple to operate and perfect for those with limited muscular control or where plugs are continuously being lost. For basins with overflow.

Product	Colour	Code Number
Clicker Slotted Basin Waste	Chrome	S2172023

Clicker Unslotted Basin Waste - 32mm

This simple push down clicker waste is simple to operate and perfect for those with limited muscular control or where plugs are continuously being lost. Non slotted for wash basins without overflow.

Product	Colour	Code Number
Clicker Unslotted Basin Waste	Chrome	S2172024

Pressflo Basin Waste - 32mm

Water pressure in the basin keeps the plug closed. Simple finger pressure on either side of the plug allows water to flow past it and away, emptying the basin. Perfect for those with limited muscular control, or where plugs are continually being lost. For vitreous china washbasins only. The waste unit is slotted for overflow.

Product	Colour	Code Number
Pressflo Basin Waste	Chrome	P6848501

NoCalc Water Treatment

The ultimate water treatment system, NoCalc, which allows you to protect an entire house from the build up of limescale

Product	Code Number
NoCalc Water Treatment	S2199034

- Reduces energy bills
- Removes sand, dirt particles, and impurities (debris)
- Protects taps, valves and stopcocks
- Improves the quality of drinking water
- Protects against build up of limescale and corrosion

CalMag Magnetic Scale Inhibitor

Limescale prevention for boilers, cylinders, showers, washing machines, dishwashers and all other heating appliances. Fits 15mm pipework and is suitable for the entire house.

Product	Code Number
Scale Inhibitor	S2199047

Sink Waste - Combined Overflow 38mm

For fixing to kitchen sink tops of practically any design. Supplied with plastic drain plug.

Product	Colour	Code Number
Sink Waste	Chrome	S2361001

Bath Waste - Combined overflow with plug and chain 38mm

Will fit to virtually any design of bath tub, supplied with the choice of either a chrome or plastic drain plug, chrome overflow ring, chain and stay.

Product	Colour	Code Number
Bath Waste Chrome Plug	Chrome	S2360503
Bath Waste Plastic Plug	Chrome/Black	S2360504

Bath Pop-up waste Combined overflow 38mm

Will fit to virtually any design of bath tub, chrome operating wheel locates within the overflow hole, simple rotation will raise or lower the chrome plug.

Product	Colour	Code Number
Bath Pop-up Waste	Chrome	S2362001

Low Profile Waste Trap Pum System

A space saving waste trap that helps prevent bad odours. Perfect for bathroom furniture. The PUM membrane allows for a good water flow capacity.

Product	Colour	Code Number
90° Waste Connector	White	S2159020
90° Waste Connector	Chrome	S2159021

Air Body Dryer

AirBody Dryer is the ultimate all-over body dryer, using innovative technology to effortlessly dry you before you leave the shower. The perfect way to stay warm, avoid slips in the bathroom and get dry gently and fast, with minimal effort required. AirBody Dryer is the most hygienic way to dry, maintaining optimum temperature and ensuring efficiency.

- Air jets are positioned vertically at different heights to maximise thermal efficiency
- An average of 3 - 6 minutes drying time
- Can help skin complaints
- Easy to install

2010

Stelrad's range of Low Surface Temperature radiators is the most comprehensive in the UK, with sizes and models to suit all applications. They all meet NHS Guidance for 'safe hot water and surface temperature' and are finished in antibacterial paint as standard making them the number one choice for safety critical environments.

The LST Standard leaves you free to specify your preferred controls and can be installed in domestic, commercial and public buildings' running heating systems with total public safety assured.

Every Stelrad LST radiator is supplied with an attractive, flat panel outer casing, which is totally reversible to allow piping flexibility. Simple and quick to install, the casing is held by security fittings with a unique seam fixing bracket system to prevent unauthorised access to the emitter accommodated inside – and for added protection, the smooth surface is coated in anti-bacterial paint.

The emitter itself provides high outputs through convection for outstanding heating performance. Strictly controlled independent laboratory testing ensures that each emitter is guaranteed to perform to a maximum working pressure of 116 psi (8 bar) and conform to BS EN 442, the European Standard for radiators.

The LST range offers all the specified components required in one robust package, and, as you would expect from Stelrad, every LST radiator is guaranteed to deliver outstanding performance and dependability.

Every radiator comes wrapped in robust, practical packaging that will keep the product pristine, right through to handover. Protective through storage and transit, the new packaging design also allows for installation prior to removal.

Low Energy Bulkhead Light

- Vandal resistant construction
- Polycarbonate diffuser and base
- Suitable for internal and external use
- 28watt switch start
- Rated IP65 drench resistant
- Complies with EN60598
- Size 296mm diameter

Product	Code Number
Low Energy Bulkhead Light	H0746525

Bathroom Ventilation

Bathroom ventilation helps to prevent build up of condensation which can lead to mould production, stale smells and poor air quality. N&C Phlexicare offer a variety of ventilation units for the effective extraction of water vapour. The extraction rate is the speed at which a fan can move air, the higher the rate of extraction the faster the room clears. Building Regulations stipulate that a bathroom extractor fan must extract at least 54m³/hr in a standard domestic bathroom.

The rate of extraction you require depends on the size of the room and the amount of condensation produced. The bigger the room or if large amounts of condensation are produced, then the more the air will need to be replaced in the room, thus you need a higher rate of extraction.

There are different types of ventilation fans available. An inline fan is where the fan motor is remotely sited within the loft space and is connected to the fascia and external wall grill by the supplied flexible ducting.

A wall mounted fan is where the fascia has an integrated fan and the ducting passes through the wall to an external grill.

Turbo- Cyclone Inline Fans - Illuminated

Anti Ligature

Door, Window and Washroom Fittings

A range of door furniture, window fittings and washroom fittings designed for the less physically abled and the Mental Health Care Markets for use in applications where there is a risk of harm to themselves or others.

Our anti-ligature products are ideal for use in psychiatric wards, hospitals, mental institutions, care homes and prisons. With a large choice of anti-ligature products to choose from, ranging from door handles to pull handles, bathroom turns to hinges you are able to protect all ligature points which might put a person at risk.

We fully recognise that staff safety issues will vary widely between establishments. Our products are manufactured to be fit for purpose, robust and provide members of staff with all the necessary safety features required to address the challenges that can arise. Our products have been tested in accordance with DHF (Door and Hardware Federation) technical specifications for 'door mounted anti ligature devices for safety and security purposes' (TF001).

Anti Ligature Hinge

- Double ball bearing butt hinge
- Chamfered tips reduce ligature points
- Satin Stainless Steel

Product	Code Number
100X75mm	H0434201

Accessible Sashlock Case

- Mortice Sashlock Case • Euro Profile
- Radius forend • Reversible latchbolt
- Satin Stainless Steel

Case	Backset	Code Number
94mm	70mm	H0434203

Accessible Latch Case

- Mortice Latch Case
- Radius forend • Reversible latchbolt
- Satin Stainless Steel

Case	Backset	Code Number
94mm	70mm	H0434208

Accessible Deadlock

- Mortice Deadlock Case • Euro Profile
- Satin Stainless Steel

Case	Backset	Code Number
94mm	70mm	H0434211

Accessible Bathroom Case

- Radius forend • 8mm follower to turn
- Reversible latchbolt
- Satin Stainless Steel

Case	Backset	Code Number
94mm	70mm	H0434214

Accessible Nightlatch Case

- Emergency Night Latch Case
- Radius forend • 8mm follower to turn
- Reversible latchbolt • Satin Stainless Steel

Case	Backset	Code Number
94mm	70mm	H0434215

Clutch Knob

- clutch knob can be fitted to standard euro profile cylinders or to existing cylinders that are part of a master key system
- Converts cylinder to anti barricade
- Can also be fitted to bathroom turn c/w chamfered edge escutcheons
- Concealed fixings to client side of door
- Satin Stainless Steel

Product	Code Number
63 x 10mm	H0434218

Anti Ligature Lever Set

- 50mm round rose • The lever is set at 45°
- Concealed fixings • Chamfered edges
- When pressure is applied lever falls to 90° vertical angle causing the ligature to slip off
- Concealed fixings to client side of door
- Satin Stainless Steel

Product	Code Number
64 x 103mm	H0434221

Lever/Knob Set

- Knob is chamfered to allow maximum grip & ligature resistance
- When pressure is applied lever falls to 90° vertical angle causing the ligature to slip off
- Concealed fixings to client side of door
- Satin Stainless Steel

Product	Code Number
64 x 103mm	H0434224

Euro Profile Cylinder Escutcheon

- Chamfered edges
- Back to back fixings
- Satin Stainless Steel

Product	Code Number
63 x 10mm	H0434227

Clutched Bathroom Turn

- Carriage key release prevents barricading
- Chamfered edges
- Spare key available
- Concealed fixings to client side of door
- Satin Stainless Steel

Product	Code Number
63 x 10mm	H0434230

Flush Pull Handle

- Can be fitted vertically or horizontally
- Supplied with face fix tamper proof fittings
- Satin Stainless Steel

Product	Code Number
150 x 150mm	H0434236

Infill Pull Handle On Plate

- Infill prevents ligatures
- Face fix
- Large diameter pull handle provides grip
- Satin Stainless Steel

Product	Code Number
300 x 75mm	H0434239

Pad Pull Handle

- Angled top & bottom to deter the attachment of ligatures
- Bolt through fixed
- Satin Stainless Steel

Product	Code Number
300 x 65mm	H0434242

Espagnolette Handle

- Handle is removable for staff use
- Ideal for top hung fanlights
- Satin Stainless Steel

Product	Code Number
Espagnolette Handle	H0434257

Window Fastener

- Prevent unauthorised opening
- Torx pin key release
- Aluminium

Product	Code Number
Cockspur Fastener	H0434260

Window Pull Handle

- Chamfered sides prevent ligature attachment
- Aluminium

Case	Code Number
150 x 34	H0434254

Coat Hook

- Hook is fixed in a ball joint held in place by a sprung ball bearing
- Supplied with tamperproof fixings
- Satin Stainless Steel

Product	Code Number
63mm	H0434263

Hinged Support Arm

- The arm can be safely locked down to discourage the attachment of ligatures

Size	Colour	Code Number
750mm	White	H0434266
750mm	Blue	H0434269

Vertical Grab Rail

- Infill prevents ligatures
- Face fix
- Large diameter pull handle provides grip

Case	Colour	Code Number
700x100mm	White	H0434272
700x100mm	Blue	H0434275

Horizontal Grab Rail

- Large diameter pull handle provides grip
- Infill prevents ligatures
- Face fix
- Infill plate is angled to facilitate drainage of shower water

Case	Colour	Code Number
700x100mm	White	H0434278
700x100mm	Blue	H0434281

Wardrobe Rail

- Designed to discourage the attachment of ligatures or standard coat hangers
- Soffit fixed

Case	Colour	Code Number
500mm	White	H0434284
1000mm	White	H0434287

Coat Hanger

- For use with anti ligature wardrobe rail
- Designed to fail if excessive weight is exerted & also to discourage the combining of a number of hangers to form a ligature point

Kitchens

Accessible, multi-user Kitchens

N&C Phlexicare believe that every kitchen should be inclusive in design to suit all user needs and abilities, with an equal emphasis on function, style and affordability. Our experienced, expert team are fully equipped to carry out a comprehensive assessment and site survey to ensure the adapted kitchen is safe, functional and suited to all users within the household.

Features and Benefits:

- Multi-user kitchens are adapted to the everyday needs of all users
- Expert assessment and site survey
- 3D CAD drawings
- High quality, solid 18mm unit construction
- Easy reach units, basket and shelving
- Adjustable height worktops and units

Adapted Kitchen

Many specifications require a kitchen to be adapted rather than replaced, possibly due to budgetary restraints or simply that there are only one or two items that need changing.

The simple replacement of the sink and/or hob with a manual or electric rise and fall worktop gives far more flexibility and access for users with physical impairments.

Fully Adapted Kitchen

Our Fully Adapted Kitchens are designed for disabled users that require a high degree of specialist features and individuality in style. We offer four different ranges with 5 door colours in each range and a huge choice of cabinets and accessories, sinks, taps, worktops, appliances, height adjustable worktops and wall units.

Service

The key to good service is communication. We believe this starts from that first call until the kitchen is in full operational use.

The process starts with a visit from one of our N&C Phlexicare technical sales executives who operate nationally, all are specially trained and able to offer advice and recommendations and involve different individuals required such as architects, contractors, occupational therapists and the end user.

Our representatives will answer any queries and carry out a thorough site survey.

Design

Once the survey has been completed, our design team at Head Office will generate a computer aided design (CAD) along with a detailed quotation. Any subsequent alterations or changes can then be made, and final plans and costs be completed.

Our Guarantee

We believe our products and services to be the very best on the market, offering customers more choice, specification and value than any other manufacturer or supplier in the U.K.

Lowered oven with side hung door

Corner carousel

Bespoke shelves

Dishwasher drawer

Pull down basket

Hartland & Hartland Plus

Our range of Hartland and Hartland Plus kitchen units have been manufactured to offer users a durable, strong and rigid 18mm solid carcass construction. Users can select from 7 inspirational door finishes, consisting of flat smooth or textured finishes. Soft close doors are available as an optional extra.

Finishes can be combined for a look personal to the user. Opt for the classic finish of Matt Ivory on its own or combine with Champagne, Driftwood or Ferrara Oak to achieve a unique, individual style.

Hartland Plus is available in 6 popular colour co-ordinated carcass options.

Hartland comes with a strong rigid white carcass only.

Matt Ivory contemporary, fresh, neutral

Ferrara Oak classic, light, fresh

Beech warm, classic, autumn

Champagne modern, neutral, light

Birch contemporary, soft, neutral

Walnut warm, indulgent, versatile

Some kitchen images through out this brochure do not contain adaptation cabinets or accessories, but show colour and styles available.

Arundel & Arundel Plus

Arundel and Arundel Plus is our premium collection of attractive, high quality kitchens that offer users a choice of on trend finishes. Opt for the heavily sought after high gloss option, for easy wipe down surfaces and attractive modern aesthetic, or from our range of traditional style, shaker doors (Scope Ivory and Milbourne Oak). Soft close doors are available as an optional extra.

Our Arundel and Arundel Plus kitchen units have been manufactured to offer users a durable, strong and rigid 18mm solid carcass construction.

The Arundel Plus range is available with 6 strong colour co-ordinated carcass options.

The Arundel range comes with a rigid white carcass only.

Porter Gloss Alabaster gloss, vintage, elegant

Porter Gloss Beige traditional, stone, gloss

Porter Gloss White contemporary, fresh, clean

Milbourne Stone classic, vintage, timeless

Milbourne Sage traditional, fresh, elegant

Milbourne Oak timeless, classic, elegant

Some kitchen images through out this brochure do not contain adaptation cabinets or accessories, but show colour and styles available.

Fully rigid colour co-ordinated cabinets

Our N&C Phlexicare cabinet carcasses constructed from a high quality, 18mm thick melamine board, available in a range of colour co-ordinated finishes. Only the best workmanship is deemed acceptable with our kitchens and that's why we don't compromise on quality. The units are glued and dowelled to give a solid pre-assembled construction. Our cabinets for both Hartland and Arundel come in a standard white finish. However, if you want that totally co-ordinated look, opt for our Hartland Plus or Arundel Plus ranges.

Recessed Plinth.

- All doors have 170 degree clip on hinges as standard
- Soft close on doors and drawers is available
- Plinths are 300mm high x 2400 mm long,
- Plinths include clear sealing strip to the floor joint.
- Wall hanging brackets made from robust rolled steel (max load 130kg per pair)
- Base and wall unit shelving have 3 height adjustment
- Drawer pack units have solid Blum Metabox drawer boxes with the bottom and back panels co-ordinated to the carcass finish

1 Hartland Range

Comes with a strong rigid white carcass only.

2 Hartland Plus Range

Available with 6 strong, rigid, colour co-ordinated carcass options.

3 Arundel Range

Comes with a strong rigid white carcass only.

4 Arundel Plus Range

Available with 6 strong, rigid, colour co-ordinated carcass options.

Coding System

When ordering your kitchen units, we have adopted a coding to allow easy specification of each range.

For example to denote Hartland Range simply enter number 1 at the end of the code, ie:

For Hartland Plus enter 2

Please Note:-

Height Adjustable Worktop Frames

N&C Phlexicare kitchens have been developed with a focus on the needs of the user, helpers and family members. This ensures that everyone can participate in daily activities on an equal basis and feel secure.

Being able to adjust the height of worktops and wall cupboards is a great help for most people. The design of height adjustable worktops for a variety of uses is particularly useful for the following:

1/ An individual's home where self reliant users have to be able to work with or without helpers.

2/ Communal and training kitchens in which several people with different capabilities have to work together comfortably at the same time.

3/ Kitchens in child care institutions where both children and adults need to manage together.

Manual Lifts

Our Indivo manual wall mounted frames are available in any length up to 3000mm. It is advised, but not essential, that a 100mm high worktop plinth be fitted beneath the worktops front and return edges to accommodate a manual crank. If a worktop plinth is not required, a collapsible crank handle must be ordered. Total loading capacity including worktop is 100kg. Height adjustment ranges from 630mm to 930mm.

A flexible plumbing kit should always be fitted to sinks installed within this worktop and frame.

For worktops with a front plinth a cover plate covers the crank handle socket.

A discrete cable tray is available to cover the longitudinal shafts at the back of the frame.

The crank handle supplied with your frame can be neatly stored on a clip beneath the worktop.

Electrical Lifts

The Indivo electric wall mounted frames are available in any length up to 3000mm. It is advisable, but not essential, that a 100mm high worktop plinth is fitted beneath to accommodate the electric switch and safety stop. Total loading capacity including worktop is 100kg. Height adjustment ranges from 620mm to 900mm. All electric models come with safety stop as standard. Electric 'L' shaped frames are also available.

The switch controlling your frame can easily be fitted anywhere along the plinth positioned beneath the worktop.

An optional hand held control may be purchased as a supplement to the plinth switch.

Electric height adjustable kitchen worktops are all fitted with a safety bar as standard to prevent any injuries due to crushing.

Worktop Support Brackets

Our Indivo brackets are ideal where a fixed height worktop is required. They are simple to adjust and have a height range of 250mm.

The distance between two brackets must not exceed 800 mm. The maximum 'evenly distributed' load for a pair of brackets is 75 kg and a flexible plumbing kit should always be fitted to sinks installed within worktops fitted to these brackets.

The height is adjusted by loosening a bolt on each bracket.

The vertical section of the bracket is calibrated to ease adjustment.

Manual Wall Bracket - Pair	P1840084

Manual/Electric Tables

The Indivo manual & electric frames for freestanding worktops and tables can be used in areas where the wall structure is not strong enough to support our wall mounted models. It is advisable, but not essential, that a 100mm high worktop plinth is fitted to accommodate either the manual crank or electric switch or safety stop. Total loading capacity including worktop is 100kg. Height adjustment ranges from 680mm to 980mm.

Electric Lifts for Wall Cupboards

The Indivo electric wall cabinet lift can be used with cupboards of 500 - 704mm in height and up to 2400 mm in length.

An extension plate can be installed increasing the overall height to 900 mm. A one lift motor is used for cabinet widths of 400mm - 1200mm and has a load capacity of 110kg. Using a two lift motor for cabinets 1201mm -2400mm the capacity doubles to 220kg.

The frame will adjust down from its optimum height by 430mm and extend toward the user by 180mm.

Electric lift for wall cupboards 400 to 1200mm wide. The diagonal adjustment has a single motor with two cross braces allowing a cabinet to move down by 430mm and forward by 180mm.

Electric lift for wall cupboards 1201 to 2400mm wide. The diagonal adjustment has twin motors with two cross braces allowing cabinets to move down by 430mm and forward by 180mm.

A pressure sensitive safety plate installed beneath the wall cabinets will suspend downward movement if resistance is encountered. The unit will then automatically rise by 10 to 30mm releasing tension between the safety stop and obstruction.

Vinyl Flooring

Tile and Sheet Range

Vinyl Flooring is a multi-purpose, durable, semi flexible floor covering that provides a slip resistant surface. Vinyl Flooring is an excellent choice for care homes, hospitals, schools, offices and shops.

Our N&C Ikon Vinyl Tiles and N&C Ikon Sheet offers an excellent wear rating and a multitude of colour options, making it a versatile option for safety flooring.

- 16 popular colours, including 10 marble options
- Suited to domestic housing and general refurbishment
- Co-ordinates with the Ikon Plain Colour Tiles Collection
- Hygienic flooring option
- Nationwide stock, immediate availability
- Light reflective values (LRV) values provided

Ikon Vinyl Floor Tiles 300 x 300mm

The range consists of 16 popular colours, 10 marble and 6 minimal design. N&C Ikon Vinyl Tiles are particularly suited for use in domestic housing and general refurbishment. The N&C Ikon Vinyl Floor Tiles have been designed to co-ordinate perfectly with the N&C Ikon Plain Colour Range of ceramic wall tiles.

Ikon Wetroom Safety Vinyl Sheet

N&C Ikon Wetroom Safety Vinyl Sheet is a high performance slip resistant safety flooring for wet and dry areas for both barefoot and shod users. This enhanced slip resistant, safety vinyl floor covering has a raised emboss design for applications where there are continuous wet areas, achieving a slip resistance PTV of 36+.

Weld Rods are 4mm thickness & 100 lm coils available in full rolls only.

Wall and Floor Tile Ranges

Designing for an ageing population and making considerations for people with conditions such as dementia and the partially sighted means that they can potentially maintain their independence in their homes for longer. It also means that care homes can feel at ease and able to navigate within their surroundings. There are also around 2 million people in the UK that have vision impairment. It is therefore essential to design and maintain people's homes & commercial environments to address this.

The characteristics of ceramic and porcelain tiles makes them an easy to maintain, hygienic wall covering option. We offer a wide collection of wall and floor tiles for care homes, local authorities, housing associations and the residential and commercial sector. We offer over 150 inspirational wall and floor tiles ranges to suit different tastes, trends and finishes.

- Over 150 on trend designs from budget to high end options
- Light reflective values (LRV) values provided
- Hygienic wall and flooring covering
- Design considerations for different available
- Nationwide stock, immediate availability

Understanding Light Reflective Values

A colour's Light Reflectance Value (LRV) measures the amount of visible and usable light that reflects from (or absorbs into) a surface. In other words, LRV measures the percentage of light a surface color reflects. We provide Light Reflective Values for our N&C Ikon Plain Colour collection to help you determine the best suited tiles in order to achieve the required contrast.

Ceramic wall and floor tiles with skirting tiles must match the walls in order to meet the recommendations of BS8300 which states 'Whilst there is considerable confidence in recommending a difference in LRV (Light reflective value) of 30 points or more (the good zone) there is also some evidence to suggest that a difference of around 20 points might still be acceptable, provided the illuminance on the surfaces is 200 lux or more.

To avoid giving the wrong impression about the size of a room, skirtings should have the same LRV as the wall so that the junction between the skirting and the floor marks the extent of the room'. A test method for measuring the LRV of flat surfaces with opaque materials, including those coated with non-opaque coatings, or coverings and multi-coloured surfaces, is described in BS 8493.

Same tile - no contrast
30 points difference
20 points difference
Inadequate contrast

Ikon Plain Colour Wall Tile Range

Our N&C Ikon plain colour collection is the longest established plain colour tile collection in the UK. With over 40 colours, 5 popular sizes, multiple finishes and high stain resistance, we offer an unrivalled solution for residential and commercial projects nationwide.

Ikon Plain Colour Wall Tile Range - Technical Data

Before fixing, please ensure that the tiles purchased are of the same batch as no responsibility can be accepted after the tiles have been fixed. We recommend that all ceramics should be fixed using Nicobond adhesives, grouts and accessories. Nicobond recommend that all ceramic tiles are installed according to the Nicobond 'Tiling Solutions' Guide and in accordance with BS5385.

Important Notes

We reserve the right to update and change the specification of products within this catalogue without prior notice or consultation.

Products shown in this catalogue are subject to availability.

The colour representation in this catalogue is as accurate as the printing process will allow.

We cannot be held liable for any product description or product coding inaccuracies within this document.

Product colours are designed to co-ordinate with each other rather than match.

Please refer to our current price list for our full terms and conditions.

Please refer to our export department for our export terms and conditions.

N&C Phlexicare Product Warranty Statement

The Phlexicare products listed below are covered by either 5 year or lifetime warranties.

Phlexicare Premier Shower Deck – ‘Lifetime’

Phlexicare Shower Trays – ‘Lifetime’

Phlexicare Pro-doors – ‘Lifetime’

Phlexiflow Pumps* – ‘5 Years +’

Evolve Shower Seat– ‘25 Years’

Confidence in the quality of our products allows us to offer either a ‘lifetime’ or ‘5 year’ warranty on various products. If these products are proven to be defective by reason only of manufacturing workmanship we will, at our discretion, provide replacement product free of charge. Our liability is limited to the cost of replacement only on production of purchase invoice or receipt.

This warranty excludes normal wear and tear in a domestic or residential application. Product Abuse, misuse, improper installation or any other type of damage are excluded from this warranty.

References

*Excludes electrical components

*1 Subject to our standard delivery schedule. Does not include delivery to Ireland.

*2 Subject to the ‘N&C Phlexicare Product Warranty Statement’.

N&C Building Products Ltd. Registration Number:140 Registered in England

Complete Support for Specifiers

We offer a comprehensive specification service for our manufactured products. We work closely with Local Authorities, Housing Associations, Care Home Providers, Architects and Design & Build companies, achieving high quality specifications that add value to a scheme, whilst achieving budgets.

We have been manufacturing for over 100 years and have expertise in the manufacture and specification of Independent Living Solutions, Wet Rooms, Sanitaryware, Commercial Washrooms, Bathing & Showering products, Ceramic, Porcelain & Natural Stone Tiles, Tile Adhesive & Grouting Systems and Screeds. We offer specifiers the opportunity to benefit from a total 'bathroom or washroom' solution from one British Manufacturer.

- **Technical Drawings**
- **CAD Blocks (supplied as jpeg, pdf or dwg files)**
- **Light Reflective Values (LRV Values)**
- **3D Bathroom & Kitchen CAD drawings**

Our 50 strong technical sales team cover England, Scotland & Wales, giving us true national coverage. As a team of experts, we are available to visit you at your premises or on site, to aid you in creating a specification that will help your current project stand out from the crowd in offering true accessibility, whilst also coming in under budget.

We are expert in value engineering an existing specification using high quality N&C products that exceed all the relevant BS/EN standards, whilst improving the aesthetics of a project and ensuring that deadlines are met.

Written specifications are available, as are 3D CAD drawings for our specialist bathroom & kitchen adaptation products.
